

June 11, 2021 -- LATICRETE International Inc., a global supplier of tile and stone installation materials and construction chemicals announced the groundbreaking of its new factory in LingYing County, Henan Province China. This will be the third LATICRETE factory constructed in China.

The company held a groundbreaking and ribbing cutting ceremony on June 11th, 2021 attended by the General Manager of LATICRETE China, Jenny Fu along with the LATICRETE China management team, representatives of the local municipality, and distributors. Faisal Saleem, President & COO International Division, thanked the LATICRETE China team and distributors for a great 2020 and a very strong start to 2021, by wishing the team success in the Linying plant operations.

"LATICRETE China is committed to building more plants to service its customers more efficiently to realize the strong growth potential in China," said Faisal Saleem, President & COO International Division.

This plant when constructed, will serve the northern region of China by improving the logistics to the region for customers and distributors.
