I am excited to share our latest newsletter with you. In reviewing the contents of our newsletter, our team in Australia have been focused and committed to what we believe — we are customer focused, providing the technology and innovative solutions for permanent tile & stone installations and repairs for the construction market.

LATICRETE offers a dedication to quality that results in globally proven solutions for virtually every flooring, waterproofing and facade application.

Just some highlights in this issue:

We have new team members: Rowan Payne, Business Development Rep in QLD; Corey Downes, Technical Service Rep in VIC and Daniel McAlister, Manufacturing, QLD.

Congratulations to Craig Hunter for being recognised and awarded “Rep of the year” by Amber Tiles.

Thank you to our stockists who took the time out to provide us with your feedback in participating in our Customer Satisfaction Survey. We value your feedback! Congratulations to Dave from Stone & Tile Centre, VIC on winning the pallet of 335.

In supporting our commitment to training and education, we share some of the photos and details of trade events, TAFE and in-store training over the last couple of months.

Our team also got involvement in a community project called A Brave Life and Lids4Kids.

Also featured is an interesting and informative article from Fred Gray, Technical Service Manager, on “Working with products containing respirable Crystalline Silica.” Additional technical installation tips as we enter into Summer.

We share in some projects across Australia where our installation materials have been used and share photos of our winners in various competitions that we’ve run.

We look forward to the upcoming, busy season before the team at LATICRETE Australia take a break over the Christmas period. Be sure to note the important dates as provided in our 2019 Holiday Schedule and reopen dates for 2020.

Make sure you’re up to date with all things on LATICRETE by following us on social media.

For Technical Support, or to chat with us about your next project, call LATICRETE on 1800 331 012 or email: sales@laticrete.com.au

We hope you enjoy reading this issue.

Thank you for your continued support to LATICRETE.

As this will be the last newsletter for the year, the team & I wish you and your family a safe and wonderful Merry Christmas, and best wishes for 2020!
ANNOUNCEMENT
LATICRETE AUSTRALIA APPOINTS REPRESENTATIVES

We are excited to announce the appointments of Rowan Payne, LATICRETE Business Development Representative in Queensland and Corey Downes, Technical Sales Representative looking after the Victorian and Tasmanian markets.

Rowan has an extensive background in sales in the construction industry and will be focused on developing new business relationships for LATICRETE in Queensland working with Architects and Engineers, major constructors, and the traditional re-seller network. Rowan has a well-developed understanding of the construction industry and has what it takes to be successful in it. Rowan comes with a wealth of knowledge and is enthusiastic about the industry.

Corey comes to us from Victoria with a Bachelor of Business in Accounting and is also a qualified Tiler and Waterproofer. Corey’s career in the construction market started with working for the family tiling business before working in commercial tile sales, and progressing to operating his own tiling business. Corey has an in-depth of knowledge of the tiling industry which makes him a great fit for LATICRETE Australia.

To discuss specifications, available installation systems, product information, and job site technical advice, contact LATICRETE by calling 1800 331 012 or contact us here.

ADDITIONAL NEW EMPLOYEES

Daniel McAlister
Manufacturing, Head Office, QLD
PROFIT THROUGH KNOWLEDGE

The Profit Through Knowledge (PTK) technical seminar is an intensive training program specifically developed for LATICRETE distributors, dealers, installers and other professionals interested in becoming familiar with LATICRETE products. Training encompasses both classroom instruction and hands-on product demonstrations by experienced LATICRETE team members. LATICRETE offers segmented classes covering tile and stone installation systems.

PTK TRAINING

In August LATICRETE Australia held a free Pool Tiling Installation Systems PTK seminar at the LATICRETE Training Centre in NSW. Attendees were actively involved in classroom learnings & discussions, and hands-on demonstrations using LATICRETE products, from substrate preparation right through to grouts, for successful pool tiling installations as documented in the LATICRETE Pool, Spa and Fountain Tiling Systems Brochure. Relevant Australian standards pertaining to swimming pools were also highlighted.

Also in August, a free Waterproofing Seminar was held at the LATICRETE Training Centre in QLD. Attendees participated in discussions, classroom learning, and hands-on demonstrations using HYDRO BAN® waterproofing and crack isolation membrane and HYDRO BAN Fillet and Sealant.

UPCOMING SEMINARS NEAR YOU:

Melbourne: 26th November, 2019  Topic: Waterproofing Training
Sydney: 4th December, 2020  Topic: Waterproofing and Epoxy Grout Training
Brisbane: 1-2 April, 2020
Melbourne: 6-7 May, 2020

At LATICRETE we provide training and classes that discuss commercial, residential, industrial tile and stone installation practices and industry standards.

To register your interest, contact your local LATICRETE Technical Sales Rep. Alternatively, call 1800 331 012 or email: seminars@laticrete.com.au
ON-SITE TRAINING & SUPPORT

The last few months the LATICRETE Technical Sales Reps have been committed in continuing to educate and provide technical support to the tile, stone and flooring industry.

TRAINING WITH ICON TILING GROUP AND RYAN POOLS

Talk about commitment - The teams from Icon Tiling Group and Ryan Pools received on-site, hands-on LATICRETE product training with Joe Tabone and Craig Hunter, LATICRETE NSW Technical Sales Reps. The teams had discussions about Australian tiling standards and learnt more about using SPECTRALOCK® PRO Premium Grout®

GROUTING PROCEDURES WITH DEEMAH STONE

Joe Tabone, NSW LATICRETE Technical Sales Rep, met up with the team from Deemah Stone in September to discuss tips and the correct procedures to follow when working with LATICRETE grouts, SPECTRALOCK PRO Premium Grout and PERMACOLOR Grout. Joe covered a range of topics including mixing ratios, installation procedures, and grout maintenance.

LATICRETE QLD TEAM TRAINING & DEVELOPMENT

Shane Anderson, LATICRETE QLD Technical Sales Rep, conducted training with LATICRETE employees on SPECTRALOCK PRO Premium Grout, where they had the opportunity to learn and try their hands at grouting! LATICRETE is committed to fine tuning the skills of our team in supporting architects, specifiers and tile & stone construction professionals.
The team were actively involved in additional trade events and demos across NSW, QLD and VIC. Contact your local LATICRETE Technical Sales Rep to arrange a trade event at your store. Follow us on social media to keep-to-date on upcoming trade events near you!

**COLORTILE BROOKVALE**
LATICRETE was at ColorTile Brookvale, with Robyn and the team, providing hands-on training using SPECTRALOCK® PRO Premium Grout*. Those who attended had the opportunity to get their hands dirty while working with SPECTRALOCK PRO Premium Grout. Tradies also had the opportunity to chat with Joe and Craig about STONETECH®, our floor and stone care product range. The trade afternoon was a huge success!

**TUGGERAH TILES**
Craig Hunter, LATICRETE NSW Technical Sales Rep, was at Tuggerah Tiles, providing hands-on training using SPECTRALOCK PRO Premium Grout. Attendees had the opportunity to get their hands dirty while working with SPECTRALOCK PRO Premium Grout, and were able to chat with Craig to gain a better understanding of LATICRETE tile & stone installation materials.

**NORTHERN RIVERS TILES & MOSAICS**
Shane Anderson and Rowan Payne, LATICRETE QLD Technical Sales Reps, were at Northern Rivers Tiles & Mosaics for a trade afternoon in October. Owners, Joy and Ray, along with some of their customers had the opportunity to participate in hands-on training with a range of LATICRETE products including HYDRO BAN®, SPECTRALOCK PRO Premium Grout, 335 Premium Flexible Adhesive, Ultra X8 Polymer Fortified Flexible Adhesive.

**AMBER EASTWOOD**
Tilers and builders gathered for a trade afternoon at Amber Eastwood in NSW. Those who attended had the opportunity to demonstrate with HYDRO BAN® and MVIS™ Veneer Mortar and get to chat with Craig Hunter, LATICRETE Technical Sales Rep, about LATICRETE System Warranties.

**TILERS TRADE OUTLET**
In August LATICRETE had the opportunity to attend the 2nd birthday bash for Tilers Trade Outlet in Port Melbourne, VIC. LATICRETE was a proud sponsor of a special giveaway, which was won by Sam from S&V Tiling & Construction.

*United States Invention Patent No.: 6881768 (and other Patents)
OUR COMMITMENT TO TRAINING CONTINUED

IN-STORE STAFF TRAINING

To register your interest, contact your local LATICRETE Technical Sales Rep. Alternatively, call 1800 331 012 or email: seminars@laticrete.com.au

**TBC TILES**
Glenn Mannix, LATICRETE Technical Sales Rep, was at TBC Tile in North Parramatta, NSW training Claire, Young and the team on SPECTRALOCK® PRO Premium Grout.

**TUGGERAH TILES**
Craig Hunter, LATICRETE NSW Technical Sales Rep, trained the ladies at Tuggerah Tiles on a range of STONETECH® floor and stone care products.

**AMBER GREGORY HILLS**
Glenn Mannix, LATICRETE NSW Technical Sales Rep, visited the team at Amber Gregory Hills, NSW, where Georgia, Wayne and Rachel went through training on a range of LATICRETE products and systems.

**AMBER PORT MACQUARIE**
Craig Hunter, LATICRETE NSW Technical Sales Rep, was recently at Amber Port Macquarie training the team on a range of STONETECH floor and stone care products.
TAFE TRAINING

LATICRETE supports and assists TAFE facilities in developing and educating students to gain a better understanding of the ceramic tile and stone industry.

TRAINING AT MACQUARIE FIELDS TAFE
Approximately 24 students received hands-on training with SPECTRALOCK® PRO Premium Grout*. LATICRETE Technical Sales Rep, Glenn Mannix and Craig Hunter, are actively involved in facilitating training to 3rd year students using SPECTRALOCK PRO Premium Grout. The students were devoted to their craft both in the classroom and with hands-on training. Well done guys!

TRAINING AT RANDWICK TAFE
A small but attentive class at Randwick Tafe, Craig Hunter, facilitated training to 1st year students, around the classifications of adhesives. The students were hands-on in practical learning, while demonstrating with a wide range of LATICRETE adhesives and also learning the technical aspect of adhesives.

TRAINING AT NEWCASTLE TAFE
Craig Hunter facilitated training to 3rd year students around the benefits of epoxy, SPECTRALOCK® PRO Premium Grout and the installation process.
AMBER TILES AWARDS

In October Amber Tiles held an awards night ceremony in Sydney, NSW. Fred Gray, LATICRETE Technical Services Manager, attended the ceremony to accept the ‘Rep of the Year’ award on behalf of recipient, Craig Hunter, LATICRETE NSW Technical Sales Rep. Craig later met with Andrew Younan, Amber Tiles Head Office Management, who presented the award to him.

The ‘Rep of the Year’ was awarded to Craig to recognise his outstanding excellence in service - Congratulations Craig, very well deserved.

LATICRETE ATTEND EXPO WITH JH WILLIAMS

Shane Anderson and Rowan Payne, LATICRETE QLD Technical Sales team attended a Trade Expo held by JH Williams in October 2019.
HYDRO BAN®

HYDRO BAN® is a thin, load bearing waterproofing/crack isolation membrane that DOES NOT require the use of fabric in the field, coves or corners. HYDRO BAN is a single component, self-curing liquid rubber polymer that forms a flexible, seamless waterproofing membrane that bonds directly to a wide variety of substrates. HYDRO BAN is a certified low VOC emitting product. HYDRO BAN is extensible Class 3 membrane suitable for immersed installations, internal wet areas and external above ground use.

HYDRO BAN features rapid drying time for a faster time to tile, and changes colour from a light sage to an olive green when cured.

Key Features
- Meets and exceeds the requirements of AS4858 and AS4654.1 for a Class 3 Membrane.
- Thin; only 0.6 mm - 0.9 mm thick when cured.
- Anti-fracture protection of up to 3 mm over shrinkage and other non-structural cracks.
- “Extra Heavy Service” rating per TCNA performance levels (RE: ASTM C627 Robinson Floor Test).
- IAPMO approved.
- Contains antimicrobial product protection.
- Safe - no solvents and non-flammable.

Click here for more product information.

Are you getting ready to start a project? Contact us about your next project or to arrange FREE samples. Call 1800 331 012 or email us here.
TILING & GROUTING IN HOT TEMPERATURES

Summer is just around the corner, so make sure you are ready for the heat by reading these helpful hints and tips for tiling in hot weather!

You want to ensure the best installation of your projects over the hotter months, and there is a simple rule to follow when an installation is subjected to high temperatures: The 8°C Rule — for every 8°C above 21°C, Portland cement and epoxy based materials take half as long to cure.

Continue reading the Hot Weather Tiling and Grouting TDS-1018 here.

For Technical Support contact 1800 331 012 or email: support@laticrete.com.au

HELPFUL HINTS:

- For best results, always ship and store installation materials at 5°C – 32°C to extend the shelf life and working time. Do not store products in direct sunlight. If installation materials are too warm, they should be cooled to the specified temperature range for that specific product.
- Dampen or wet down substrate surfaces to not only clean the area, but to lower the temperature and lower the absorption rate of the substrate. Sweep off excess water just before mortar is applied. This step will extend the working time of the installation materials.
- Stir latex additives thoroughly before mixing with thin-sets, grouts, plasters, stuccos and other Portland cement mortars.
- Due to the rapid rate of moisture loss and Portland cement dehydration at temperatures >32°C, cover installations with polyethylene sheeting for 1-2 days to allow curing at a more normal rate.
- Low humidity also accelerates the curing process.
- Tent off or provide shade when working in direct sunlight.
- Work during cooler periods of the day (e.g. early morning).

There is a simple rule to follow when the temperature is high during installation: The 8°C Rule — for every 8°C above 21°C, Portland cement and epoxy based materials take half as long to cure.
WORKING WITH PRODUCTS CONTAINING RESPIRABLE CRYSTALLINE SILICA

Article by: Fred Gray, Technical Service Manager

Amongst the many and varied activities in the construction industry, ceramic and stone tile fixing, which in itself covers a very broad range of products and practices, may expose workers and others to unacceptable levels of Respirable Crystalline Silica (RCS) that may be deleterious to health or eventually fatal over the short or long term.

RCS particles are nominally less than 10 µm in size and if often referred to as the dust you can’t see. Its potential to be present as a hazard in the workplace is dependent on, amongst other things, the products we are working with, site conditions and how we process and handle them to carry out a ceramic or stone tile installation. For instance, dry machine cutting sandstone in unventilated, enclosed areas without personal protection is going to expose a worker or others to unacceptable levels of RCS, is not advised and illegal.

Avoiding exposure to RCS whilst working (or at any other time, for that matter) is therefore paramount. The good news and advice from Safework NSW “you can work with silica and remain safe.” The travelling Silica Dust Control Roadshows hosted by Safework in the various states are well worthwhile events to set the record straight on working with silica to mitigate the risks associated with RCS. If you can’t make it to one of these events, publications like https://bit.ly/2C0Nhq4 is a great start to taking control and understanding the RCS risk. Along with other relevant topics, it discusses how “You can manage risks of exposure to silica dust by selecting and implementing measures using the hierarchy of controls.”

Globally, LATICRETE have been proactive in developing silica free products and assessing the RCS risk with current range of tile installation products. Studies on the levels of RCS in LATICRETE NA products containing silica and have published their findings in the following technical data sheet. https://bit.ly/2pigYk5 Locally, we have assessed our products containing silica and found our products also be low in RCS and we are actively looking to commercialise more silica free products to our industry.

Other tile industry studies and investigations have also found low but manageable risks that can be controlled to provide safe working and liveable environments. The Tile Council of North America in the 2019 Handbook have published a study by Environmental Health & Engineering INC, on Human Health Risk Assessment for Proposition 65: Crystalline Silica - worth reading for information on installing ceramics. https://www.tcnatile.com/

It is hoped that with good products, education and work practice, health hazards from RCS are eliminated for the work place.
SEALERS & CLEANERS

SEAL STONE TESTING AND TREATMENT

Determining if a stone is sealed is an important question which must be answered prior to considering the application of a new sealer treatment. Realising if an unsealed stone surface will be able to accept a sealer is also important in determining how to move forward.

There is a very simple and inexpensive test to determine if the stone, Saltillo tile or cement-based grout is currently sealed, or if it even requires a sealer.

Water Test: The quick and easy test is performed with water and can provide valuable information about the current state of the stone or grout surface.

1. Apply water in a few different areas of the stone and/or grout
2. Make each application of water approximately 25mm wide
3. Roughly measure the size of the circle of water without making contact with the water. Make a notation as to the size of each application of water
4. Place a drinking glass over each application of water to protect from evaporation
5. Let sit undisturbed for 20 min

6. After 20 minutes remove the glass’s and observe the results:
   a) No change: If the water appears the same as when it was applied and the water measures the same diameter, then a sealer is already present or the stone is very dense and does not need a sealer
   b) Slight change: If the water is still present in a bead but appears to be absorbing into the surface then a sealer may already be present but requires resealing, or, the stone is not sealed and is dense enough to allow for the slow absorption of water
   c) Complete change: If the water is completely absorbed into the surface and the spot appears to have grown in size then the stone is not sealed and the use of a high quality sealer (e.g. STONETECH® BulletProof®, STONETECH Heavy Duty Sealer, STONETECH Impregnator Pro®, etc.) is strongly recommended

For more information click here to read Technical Data Sheet TDS-1261.
AUSTRALIAN PROJECTS

FEATURED PROJECTS

Featured projects across Australia where LATICRETE tile & stone installation materials have been used in the last couple of months. Some of the projects have been completed and some are still ongoing.

KANGAROO POINT WALL, QLD

PROJECT INFO: Feature wall, measuring up to 6 metres high, at Kangaroo Point in Brisbane, QLD. The teams from McNab, Melos Rendering, SEQ Waterproofing and Sun Gold Tile, have worked on this 125m2 project that features stackstone installed with a range of LATICRETE materials.

TILING CONTRACTOR: Sun Gold Tile

EZARRI MOSAIC POOL, NSW

PROJECT INFO: Pool in Narraweena, NSW, features 110m2 of Ezari Glass Mosaic tiles, which have been installed using a range of LATICRETE materials to qualify for a 15 Year Pool Installation Warranty.

TILING CONTRACTOR: DTR Tiling and Mix Mud Rendering

PRODUCTS: 3701 Mortar Admix, 226 Thick Bed Mortar, LATAPOXY Moisture Shield, HYDRO BAN, HYDRO BAN Fillet & Sealant, 254 Platinum, SPECTRALOCK® PRO Premium Grout*, LATASIL, LATASIL 9118 Primer

WARRANTY: 15 Year Swimming Pool System Warranty.

BALGOWLAH MOSAIC POOL, NSW

PROJECT INFO: Pool project in Balgowlah, NSW. The 170m2 pool features Leyla Mosaic tile.

TILING CONTRACTOR: Dimension Tiling

PRODUCTS: 335 Premium Flexible Adhesive, PERMACOLOR® Grout in ‘Silver Shadow’.

LARGE FORMAT TILE BATHROOM, QLD

PROJECT INFO: Murray Heazlewood and the team from SEQ Tiling and Cladding renovated this residential bathroom in Newmarket, QLD. The project will features 2400mmx800mm, large format porcelain tiles installed with a range of LATICRETE products.

TILING CONTRACTOR: SEQ Tiling and Cladding

PRODUCTS: 254 Platinum, HYDRO BAN, HYDRO BAN Fillet & Sealant.
FEATURED PROJECTS

CROYDON NORTH POOL, VIC

PROJECT INFO: Pool project in Croydon North by the team from Electric Pools, which features 120m² Light Blue Trend mosaics. A range of LATICRETE materials have been used throughout this installation including HYDRO® BAN, 335 Premium Flexible Adhesive in White, and SPECTRALOCK® PRO Premium Grout*.

TILING CONTRACTOR: Electric Pools

PRODUCTS: 335 Premium Flexible Adhesive, HYDRO® BAN, SPECTRALOCK® PRO Premium Grout*.

LIMESTONE CLADDING PROJECT, NSW

PROJECT INFO: The team from Decore Tiling have installed 400m² external curved limestone cladding along with 650m² internal flooring tiled in limestone, including the bathrooms using a range of LATICRETE materials.

TILING CONTRACTOR: Decore Tiling

PRODUCTS: 335 Premium Flexible Adhesive, 254 Platinum.

POOL & SPA REFURB, NSW

PROJECT INFO: The team from Bradstreet Building Services have installed 50m² of Trend mosaic tiles for this pool and Spa refurbishment in Manly, NSW. A wide range of LATICRETE products were used that qualify for a 25 Year Swimming Pool System Warranty.

TILING CONTRACTOR: Bradstreet Building Services

TILE SUPPLIER: ColorTile Brookvale

PRODUCTS: 3701 Mortar Admix, LATAPoxy™ Moisture Shield, HYDRO BAN, HYDRO BAN Fillet & Sealant, SPECTRALOCK PRO Premium Grout, LATASIL™, LATASIL 9118 Primer.

Warranty: 25 Year Swimming Pool System Warranty.

MOSS VALE RESIDENTIAL BATHROOM, NSW

PROJECT INFO: The project includes two bathrooms and a powder room, which features beautiful Porcelain tiles - 600x300mm on the walls and 600x600mm on the floors. A range of LATICRETE materials have been used throughout this installation.

TILING CONTRACTOR: Kustomized Tiling

PRODUCTS: 335 Premium Flexible Adhesive, HYDRO BAN, SPECTRALOCK PRO Premium Grout and PERMACOLOR Grout.
GETTING INVOLVED IN THE COMMUNITY

In living the LATICRETE Values, the team from LATICRETE Australia have been getting involved in community projects.

A BRAVE LIFE

In August LATICRETE Australia were fortunate enough to be involved in a wonderful community project with a non-for-profit organisation, A Brave Life in QLD. A Brave Life provides newborn essentials to vulnerable and disadvantaged young mothers, under the age of 25, who are having their first baby. These young expectant mothers face a broad range of challenges such as poverty, domestic violence, trauma, relationship/family breakdowns, unplanned pregnancy and homelessness.

The team from LATICRETE Australia got to pack 100x of the Baby Bundles, to gift them to mums-to-be in the community. The Baby Bundles consisted of newborn essentials such as nappies, baby wipes, baby wash, clothing and safe feeding equipment.

LATICRETE Australia is thankful to A Brave Life for allowing us the opportunity to help out on such a worthy cause!

LIDS4KIDS

The team from Head Office in QLD have been involved in a community project called Lids4Kids.

Employees have been collecting plastic tops and lids for The Holden Rally Team, who are helping Envision Hands, an Australian not-for-profit group that trains disadvantaged people to use 3D printers to make mobility aids for child amputees around the world.
Dear Valued Customer,

LATICRETE Australia will be closing in December for the year end stocktake and the Christmas/New Year period.

NO SHIPPING OR RECEIVING
Wednesday, 18 December 2019, due to year end stocktake

BUSINESS & SHIPPING AS NORMAL
Thursday, 19 December 2019 (7am - 3.30pm)
Friday, 20 December 2019 (7am - 12pm)

ALL LOCATIONS WILL BE CLOSED FROM
Friday, 20 December 2019 (12pm)

ALL LOCATIONS WILL REOPEN
Thursday, 9 January 2020
TRIVIA FACTS

As young boys, brothers David Rothberg and Henry B. Rothberg pictured on a LATICRETE site

PROJECT: Louis-Hippolyte-La Fontaine Tunnel
Installed in the early 1960’s.

PRODUCTS: Tiled walls installed with Laticrete
4237 shock, vibration & frost resistant high
strength thin adhesive mortar.

LATICRETE TRIVIA FACTS

Trivia Questions

Q1. True or False? SPECTRALOCK® PRO Premium Grout is a Green Certified Low VOC product?

Q2. What was the first LATICRETE product developed and taken to market?

Q3. True or False? The use of fabric in the field, coves or corners is required when installing HYDRO
BAN® Waterproofing and Crack Isolation Membrane?

Q4. What decade did LATICRETE arrive in Australia? 1950’s, 1960’s or 1970’s?

FUN FACT
Did you Know?
LATICRETE is available
on 7 x Continents and
in 100x Countries

COMPETITIONS & SURVEYS

And the Winner is...

GIVEAWAY COMPETITION

In July LATICRETE Australia held a State of Origin competition where one lucky winner would receive a LATICRETE prize pack and a Flight Centre voucher!

Craig Hunter, LATICRETE NSW Technical Sales Rep, caught up with the prize winner, Joel from Tudor Tiling to hand him his prize.

Congratulations Joel, we hope you enjoy your prize!
LATICRETE Australia recently ran a Customer Satisfaction Survey for our stockists to help us gain a better understanding of how well we are meeting expectations within the tile and stone industry.

Those who participated, by completing & submitting the survey, were automatically entered into a lucky draw to win a pallet of 335 Premium Flexible Adhesive.

We are excited to announce that Stone & Tile Centre in VIC has won our lucky draw prize - congratulations!

Thanks to all the entrants for taking part in our survey and for your continued support!
