SPARTACOTE™ POLYASPARTIC PIGMENTS™

- Specially engineered reactive resin-based pigments designed to be used with SPARTACOTE™ FLEX SB™, SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Excellent results for solventless applications.
  - Available in 14 colors, including safety colors
  - Superior hide and color retention
  - Superior chemical resistance
  - Optimal for situations requiring a durable and textured surface

- Ultra-lightweight suspended additive increases abrasion resistance
- Provides added traction, thickness and durability
- Available in small 1 qt (0.9 L) and large 1.25 gal (4.7 L) format units

SPARTACOTE DIAMOND TOP™ WEAR COAT ADDITIVE

- A specialized additive for use in extreme heavy-traffic situations during the top coating phase of SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.
- Ultra-tough yet lightweight resin based traction additive designed to be dispersed into SPARTACOTE FLEX SB, SPARTACOTE GRIP™ TRACTION ADDITIVE and SPARTACOTE FLEX XT and SPARTACOTE FLEX PURE top-coats.
- Optimal for situations requiring a durable and textured surface
- UV stable, suitable for interior or exterior use
- Superior hide and color retention
- Available in 14 colors, including safety colors

SPARTACOTE™ METALLIC PIGMENTS™

- Synthetic produced metallic pigment additive for SPARTACOTE Surface Build Epoxy and SPARTACOTE™ METALLIC PIGMENTS™
- Use as a stand-alone or with aggregate for added build and then coated with SPARTACOTE FLEX clear top-coats.
- Excellent adhesion with self-leveling finish
- 1:1 mix ratio
- Available in sand beige, light grey, black and clear

SPARTACOTE VIVID DYE™

- High quality liquid dispersed concrete dye. Formulated to be applied directly to prepared concrete and then coated with SPARTACOTE FLEX clear top-coats.
- Highly durable colored quartz aggregates for use in a variety of SPARTACOTE flooring systems.
- Available in clear gloss, low gloss and pigment base forms
- Provides incredible color brilliance and depth
- Used in decorative metallic flooring systems
- Optimal for situations requiring a durable and textured surface
- Available in small 1 qt (0.9 L) and large 1.25 gal (4.7 L) format units

- Decorative vinyl or mica chips used in various flooring systems to create a terrazzo-like appearance.
- Available in 40, 60 and 100 mesh
- Provides added traction, thickness and durability
- Available in 14 colors, including safety colors

- Provides incredible color brilliance and depth
- Used in decorative metallic flooring systems
- Optimal for situations requiring a durable and textured surface
- Available in small 1 qt (0.9 L) and large 1.25 gal (4.7 L) format units

DECORATIVE CONCRETE

- A specialized additive for use in a concrete bounce ball, providing the top coating of a project.
- May be incorporated into a top coat over any SPARTACOTE system, provides for a lightly textured finish

High solids, two-component, polyaspartic coating with minimal odor (no solvent smell). Ideal for indoor applications requiring minimal downtime.
- 92% solids, two-component, polyaspartic coating. Widely used within heavy-duty environments requiring renewal durability.
- 72% solids, two-component, polyaspartic coating. Highly durable UV resistant finish.
- SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.
- SPARTACOTE™ FLEX SB™, SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.
- Provides superior abrasion resistance and flexibility.
- Excellent working time for high solids polyaspartic coating applications.
- 100% solids, self-leveling epoxy. Primarily used as a build coat with various high performance SPARTACOTE resinous flooring systems.
- Available in clear and pigment base forms
- Provides high hide and color retention
- Optimal for situations requiring a durable and textured surface
- SPARTACOTE™ SURFACE BUILD 110™
- A specialized additive for use in extreme heavy-traffic situations during the top coating phase of SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.
- Ultra-tough yet lightweight resin based traction additive designed to be dispersed into SPARTACOTE FLEX SB, SPARTACOTE GRIP™ TRACTION ADDITIVE and SPARTACOTE FLEX XT and SPARTACOTE FLEX PURE top-coats.
- Optimal for situations requiring a durable and textured surface
- UV stable, suitable for interior or exterior use
- Superior hide and color retention
- Available in 14 colors, including safety colors

- With 2:1 (A:B) mix ratio
- Available in clear only

- With 1:1 mix ratio for mulation is LEED compliant
- Excellent abrasion resistance
- Rigid in 15 minutes
- Exceeds ASTM F3010 at 12 mil thickness
- May be used over damp concrete or new/green concrete that is only 5-days old
- 2:1 (A:B) mix ratio
- Available in clear only

- 1:1 mix ratio
- Excellent adhesion with self-leveling finish
- 1:1 mix ratio
- Available in tan, grey and clear

- 3:2 (A:B) mix ratio
- Available in sand beige, light grey, black and clear

- 1:1 mix ratio
- Excellent adhesion with self-leveling finish
- Available in clear only

- 2:1 (A:B) mix ratio
- Available in clear only

- 3:2 (A:B) mix ratio
- Available in clear only
- Excellent working time for high solids polyaspartic coating applications.
- 100% solids, self-leveling epoxy. Primarily used as a build coat with various high performance SPARTACOTE resinous flooring systems.
- Available in clear and pigment base forms
- Provides high hide and color retention
- Optimal for situations requiring a durable and textured surface
- SPARTACOTE™ SURFACE BUILD 110™
- A specialized additive for use in extreme heavy-traffic situations during the top coating phase of SPARTACOTE™ FLEX XT™ and SPARTACOTE™ FLEX PURE™ polyaspartic coatings. Dispersed onsite for optimal performance.
- Ultra-tough yet lightweight resin based traction additive designed to be dispersed into SPARTACOTE FLEX SB, SPARTACOTE GRIP™ TRACTION ADDITIVE and SPARTACOTE FLEX XT and SPARTACOTE FLEX PURE top-coats.

COMMERCIAL AND INDUSTRIAL RESINOUS FLOORING

SPARTACOTE™ Coating Systems

SPARTACOTE™, the brand of concrete can be coated with SPARTACOTE GUARD™, a VOC compliant coating. For high performance commercial and industrial flooring systems, products come with specific series designations and important in the non-demanding houseworthy structure. Specification and design is very different choices can vary in color, blend contributions to house economical flooring solutions to complement any environment.

- Develops conditions to help wear to survive
- Lower thermal and solar absorption
- UV stable and non-yellowing
- No heat pick-up
- Low temperature cure
- No frost viability
- No prime coating requires a variety

SPARTACOTE GUARD™ Solid Color Coatings

SPARTACOTE GUARD™ primer can be coated with SPARTACOTE GUARD™, a VOC compliant coating. For high performance commercial and industrial flooring systems, products come with specific series designations and important in the non-demanding houseworthy structure. Specification and design is very different choices can vary in color, blend contributions to house economical flooring solutions to complement any environment.

- Develops conditions to help wear to survive
- Lower thermal and solar absorption
- UV stable and non-yellowing
- No heat pick-up
- Low temperature cure
- No frost viability
- No prime coating requires a variety

SPARTACOTE QUARTZ™ Quartz Flooring

Highly-reflective quartz aggregates to the bidet brown SPARTACOTE™ coatings to create an especially reflective finish ideal for parking dedicated

SPARTACOTE METALLIC™ Metallic Flooring

SPARTACOTE METALLIC™ is a high-temperature surface treatment that provides surfaces with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- Specialized high-performance solutions to offer remarkable options
- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SPARTACOTE VIVID DYE™ Vivid Dye Coatings

SPARTACOTE VIVID DYE™ Vivid Dye Coatings are highly reflective quartz aggregates to the bidet brown SPARTACOTE™ coatings to create an especially reflective finish ideal for parking dedicated

SPARTACOTE CHIP™ Seamless Flooring

SPARTACOTE CHIP™ Seamless Flooring is a unique non-porous finish that provides unique with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SPARTACOTE QUARTZ™ quartz Flooring

SPARTACOTE QUARTZ™ quartz Flooring provides surfaces with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SPARTACOTE METALLIC™ Metallic Flooring

SPARTACOTE METALLIC™ Metallic Flooring provides surfaces with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SEAMLESS FLOORING

SPARTACOTE QUARTZ™ quartz Flooring

Highly-reflective quartz aggregates to the bidet brown SPARTACOTE™ coatings to create an especially reflective finish ideal for parking dedicated

SPARTACOTE VIVID DYE™ Vivid Dye Coatings

SPARTACOTE VIVID DYE™ Vivid Dye Coatings are highly reflective quartz aggregates to the bidet brown SPARTACOTE™ coatings to create an especially reflective finish ideal for parking dedicated

SPARTACOTE CHIP™ Seamless Flooring

SPARTACOTE CHIP™ Seamless Flooring is a unique non-porous finish that provides unique with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SPARTACOTE METALLIC™ Metallic Flooring

SPARTACOTE METALLIC™ Metallic Flooring provides surfaces with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

DECORATIVE CONCRETE

SPARTACOTE VIVID DYE™ Vivid Dye Coatings

SPARTACOTE VIVID DYE™ Vivid Dye Coatings are highly reflective quartz aggregates to the bidet brown SPARTACOTE™ coatings to create an especially reflective finish ideal for parking dedicated

SPARTACOTE CHIP™ Seamless Flooring

SPARTACOTE CHIP™ Seamless Flooring is a unique non-porous finish that provides unique with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications

SPARTACOTE METALLIC™ Metallic Flooring

SPARTACOTE METALLIC™ Metallic Flooring provides surfaces with solidized performance and long-term stability. Suitable for industrial, commercial and high-end residential applications.

- High-quality finish that provides surfaces with solidized performance and long-term stability
- Suitable for industrial, commercial and high-end residential applications
