STONETECH® Sealer

STONETECH® Sealer is our basic sealer that provides a standard protection against most stains.

FEATURES/BENEFITS
- Standard protection against most stains
- Advanced penetrating microbond protection
- Preserves natural look of stone
- Water based formula
- Internal and exterior use

PACKAGING
- 946mL, 6 units per Case, 600 units per Pallet
- 3.8L, 4 units per Case, 160 units per Pallet

USES (INTERNAL/EXTERNAL)
- Countertops
- Splashbacks
- Floors
- Walls

RECOMMENDED SURFACES
Natural stone and Masonry Surfaces such as:
- Polished Marble
- Homogeneous Granite
- Polished Limestone
- Slate
- Polished Travertine

MANUFACTURER
LATICRETE Australia Pty Ltd
29 Telford Street
Virginia, QLD 4014 Australia

Fax: 07 3865 2250
Internet: www.laticrete.com.au
Approximate Coverage

Depending on stone type, texture and porosity; the site conditions at the time of installation; and the method of installation, the following rates of coverage will vary.

- Up to 20.9m² / 946mL for a single coat application
- Up to 83.6m² / 3.8L for a single coat application

Expected Wear

- Up to 5 years on interior surfaces
- Up to 3 years on exterior surfaces

For best results, reapply annually.

Shelf Life

Factory sealed containers of this product are guaranteed to be of first quality for two (2) years if stored at temperatures >10°C and <32°C.

VOC Content

<250g/L (excluding water) for EPA Purposes
<br/>&lt;5g/L (including water) for LEED and U.S. State purposes (Low Solids Coating)

Storage and Handling Instructions

Avoid prolonged exposure to vapors. Use in a well-ventilated area. Do not ingest. Avoid contact with eyes and skin. KEEP OUT OF THE REACH OF CHILDREN. Do not freeze or store above 38°C. Do not mix with other chemicals. Do not release to natural waterways.

Cautions

- Consult SDS for more safety information.
- Inhalation: In high concentrations, vapours maybe irritating to the respiratory system.
- Skin contact: May cause skin irritation
- Eye contact: May cause eye irritation
- Ingestion: May cause discomfort if swallowed
- Keep out of reach of children.

INSTALLATIONS

Surface Preparation

Read entire label before using. Use only as directed. Always test in a small inconspicuous area with a 24-hour cure time to determine ease of application and desired results. Allow new grout installations to cure for a minimum of 72 hours prior to application. Make sure surface is clean and free of waxes and coatings. Sealer may be applied to damp surfaces one hour after standing water has been removed. Surface temperature should be between 10°C and 26°C. Ensure that the area is well-ventilated during application and until the surface is dry. Keep children and pets out of the area until foot traffic resumes.

Application

1. Ensure cap is closed and sealed, and shake well before use.
2. Mask off surfaces not intended to be treated.
3. Liberally apply an even coat using a paint pad, roller, brush or low-pressure sprayer.
4. Allow sealer to penetrate the surface for 10-15 minutes. During this time, keep the surface wet with sealer, adding more sealer as needed. DO NOT ALLOW SEALER TO COMPLETELY DRY ON THE SURFACE.
5. Thoroughly wipe dry the entire surface with clean absorbent towels.
6. A second coat may be needed for porous, absorbent surfaces. If a second coat is required, it should be applied within 30-40 minutes from the initial application as directed in steps 3-5.
7. Should a sealer residue appear, re-wet the impacted section of the surface with sealer. Agitate the surface with a white nylon scrubbing pad to loosen residue and wipe dry with a clean, absorbent towel.
8. A full cure is achieved in 24-72 hours. Use of the treated surface may resume in 6-8 hours. If use of the surface must resume sooner, cover the treated surface with red rosin paper to protect it until full cure is achieved.
9. Clean tools used during application with water.

Cleaning

Clean tools used during application with water.

AVAILABILITY AND COST

Availability

LATICRETE and LATAPOXY** materials are available worldwide.

For Distributor information:
 Toll Free:  1800 331 012
 Telephone:  07 3865 1599

For online distributor information, visit LATICRETE at www.laticrete.com.au

Cost

Contact a LATICRETE Distributor in your area.
MAINTENANCE
Highly alkaline, acidic, ammoniated, or abrasive cleaners are not necessary for daily maintenance and may also degrade the STONETECH® sealer used, adversely affecting stain resistance. Tile and stone routine cleaning with a neutral pH cleaner such as STONETECH Stone & Tile Cleaner is recommended. For tough or difficult to remove soil use STONETECH KlenzAll™ Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results. For additional information, please refer to the TDS 1262 Stone and Tile Care Guide.
