3701 Mortar Admix

Specially designed latex admixture for use with LATICRETE 226 Thick Bed Mortar, thin-set adhesives[^], cement grouts, cement mortar beds and other cement mixes.

Product Data Sheet 1046

FEATURES

Tenacious bond

Versatile

Used in place of water

Shock, chemical and frost resistant

Stable, long-life formulation

For Extra Heavy Duty installations

BENEFITS

Superior adhesion to a wide variety of substrates and veneers, allowing for installations in virtually all climates and conditions such as exterior facades, pools and fountains.

Designed to be used in a wide range of applications.

Use 3701 Mortar Admix instead of water with selected thin-set adhesives[^], cement grouts and cement mortar beds.

Improves the working and physical properties and is shock, chemical and frost resistant with increased bond and compressive strength.

Will not deteriorate over time, suitable for interior and exterior applications, particularly continuous submersion.

Suitable for areas to receive heavy vehicle traffic such as transit ways and roads.

Uses

- Economical and easy way to make permanent, trouble-free installations
- Used in place of water, 3701 Mortar Admix improves the working and physical properties of any cement mix
- Interior and exterior installations

Suitable Substrates

- Concrete
- Ceramic tile and stone
- Concrete masonry
- Brick masonry
- Cement mortar beds
- Cement backer board*
- Cement plaster
- Cement terrazzo

Packaging

20 litre pail; 32 pails per pallet
