STONETECH® Advanced Grout Sealer

STONETECH Advanced Grout Sealer is a quick and easy to use grout sealer which helps keep cement based grout looking new.

**FEATURES/BENEFITS**

- Maximum protection against most stains
- Apply as early as 2 hours after grouting
- Continuous flow spray allows for wall-to-floor application
- Interior and exterior use

**USES (INTERIOR/EXTERIOR)**

- Countertops
- Backsplashes
- Floors
- Walls

**PACKAGING**

- 399 ml Aerosol Can, 12 units per Case, 1080 units per Pallet

**RECOMMENDED SURFACES**

- Cement based grout for natural stone, ceramic and porcelain tile.

**APPROXIMATE COVERAGE**

- Up to 152 linear meters per 383g Can

**MANUFACTURER**

LATICRETE Australia Pty Ltd
29 Telford Street
Virginia, QLD 4014 Australia

Telephone: 07 3865 1599
Toll Free: 1800 331 012
Fax: 07 3865 2250
Internet: www.laticrete.com.au
Expected Wear
- Up to 5 years on interior surfaces
- Up to 3 years on exterior surfaces

VOC Content
PWIMIR <1.50 g O3/g product (Clear coatings)

Cautions
- Consult SDS for more safety information.
- Inhalation: Move into fresh air and keep at rest. If breathing stops, provide artificial respiration. Get medical attention if any discomfort continues.
- Skin contact: Flush thoroughly with water for at least 15 minutes. Wash skin with soap and water. Get medical attention if irritation develops and persists. Frashtite: Do not remove clothes, but flush with copious amounts of lukewarm water. Call an ambulance and continue to flush during transportation to hospital.
- Eye contact: Flush thoroughly with water for at least 15 minutes. Remove contact lenses, if present and easy to do. Get medical attention immediately.
- Ingestion: Immediately rinse mouth and drink plenty of water. Keep person under observation. If person becomes uncomfortable take to hospital along with these instructions. Get medical attention if symptoms occur.

Storage and Handling Instructions
DANGER! EXTREMELY FLAMMABLE. Contains naphtha (petroleum), hydrotreated heavy (64742-48-9) and propane (74-98-6) and butane (106-97-8) as propellants. Do not use near sources of ignition, heat, flame, spark, or live electrical equipment, or while smoking. Vapours can travel to distant ignition sources. VAPOUR HARMFUL. Do not breathe vapours or spray mist. USE ONLY IN A WELL VENTILATED AREA. If unsure whether area is well ventilated, use NIOSH approved respirator with a combination HEPA/organic vapour cartridge. Prevent build-up of vapours by opening windows and doors and by using exhaust fans. Intentional misuse by deliberately inhaling contents of this container may be HARMFUL OR FATAL. HARMFUL OR FATAL IF SWALLOWED. Do not ingest. MAY CAUSE EYE, SKIN AND RESPIRATORY IRRITATION. Avoid eye and skin contact.

For safest application, wear protective eyewear, gloves, long sleeves, and long pants. CONTENTS UNDER PRESSURE. Do not puncture, incinerate, or store above 49°C. Exposure to heat or prolonged exposure to sunlight may cause bursting. Do not discard in trash compactor or burn. Do not mix product with other chemicals. Rags, clothing, and other equipment wet with product may be combustible. Clean up promptly after job is complete. Remove any clothing that comes in contact with product. Allow rags and clothing to dry in well ventilated area away from children and pets. When dry, dispose of rags. Wash affected clothing before re-wearing. KEEP OUT OF THE REACH OF CHILDREN. For professional or frequent use, a NIOSH-approved respirator with a HEPA/organic vapour cartridge is recommended. Consult product SDS.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

INSTALLATIONS

Surface Preparation
Read entire label before using. Use only as directed. Ensure area is well ventilated during application and until surface is dry. Open windows and doors and use exhaust fans. Always test in a small inconspicuous area to determine appropriate application method and desired results. Avoid spraying surfaces not intended for treatment. For new installations, product can be applied as soon as 2 hours after grouting. For best results, wait 4 hours or more. Grout should be firm to the touch before application. For cured installations, grout must be clean, dry, and free of sealers and coatings. Keep children and pets out of the area until surface use resumes.

Directions
1. Shake can well before using.
2. Hold can with extended arm 10 to 16 inches (254-406 mm) from the grout surface, aim nozzle, and spray STONETECH Advanced Grout Sealer evenly along the grout line. Keep can tilted to assure even product distribution.
3. After 10 to 15 minutes, wipe entire surface with dry cloth to remove excess sealer. If using on newly applied grout, wipe lightly to avoid disturbing grout.
4. Dried residue from excess sealer can be removed from tile surfaces by wiping with a dry cloth.
5. A second coat is recommended and may be applied within one hour of initial application.
6. On cured grout, surface traffic may begin 2-6 hours after final application. For newly installed grout, follow grout manufacturer’s guidance. It is required to keep the installation dry for a minimum of 12 hours.

AVAILABILITY AND COST

Availability
LATICRETE®, STONETECH and LATAPOXY® materials are available worldwide.
For Distributor information:
Toll Free: 1800 331 012
Telephone: 07 3865 1599
For online distributor information, visit LATICRETE at www.laticrete.com.au

Cost
Contact a LATICRETE Distributor in your area.

MAINTENANCE
Highly alkaline, acidic, ammoniated, or abrasive cleaners are not necessary for daily maintenance and may also degrade the STONETECH® sealer used, adversely affecting stain resistance. Tile and stone routine cleaning with a neutral pH cleaner such as STONETECH Stone & Tile Cleaner is recommended. For tough or difficult to remove soil use STONETECH KlenzAll® Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results. For additional information, please refer to the TDS 1262 Stone and Tile Care Guide.
