PRIME-N-BOND™

PRIME-N-BOND™ is a versatile, ready-to-use, single coat, low VOC primer designed to enhance the bond of adhesives to many smooth and non-absorptive substrates that can be difficult to bond to. PRIME-N-BOND also improves bonding of self-leveling underlayments (SLU’s).

Globally Proven Construction Solutions

PACKAGING

- Multi-purpose and can be used on a wide range of substrates
- One component, ready to use, no mixing required
- Single coat application
- Apply with roller or brush
- Formulated with aggregate for an enhanced mechanical bond of adhesives to a variety of smooth or low-absorptive substrates
- Improves bonding of cement self-leveling products (SLU’s)
- Low VOC, low odour, Ideal for interior and occupied areas

SUITABLE SUBSTRATES (INTERIOR ONLY)

- Steel Troweled Concrete
- Glass Tile
- Quarry Tile
- Cement/Epoxy Terrazzo
- Cement-Based Agglomerates
- Glazed Cement Masonry Units
- Floor Covering Adhesive and Polyurethane Adhesive residue
- Porcelain & Ceramic tiles with Glazed or Smooth surfaces
- Well-Bonded Cutback Adhesive
- Exterior Glue Plywood
- Natural Stone
- Vinyl Flooring
- VCT
- Plastic Laminate Countertops
- Resin-Backed Tile and Stone*
- Agglomerate Marble
- Ceramic Tile
- Concrete smooth and non absorbent
- Concrete with up to 20% fly ash
- Dry shake hardener
- Epoxy Coating
- Epoxy Flooring (Poured)
- Moisture Barrier (Sheet Goods)
- Non-porous Concrete
- Radiant-heated floors
- Rigid Fiberglass panels

*Light commercial applications only. See TDS 1150 for further information.

FEATURES/BENEFITS

- Steel Troweled Concrete
- Glass Tile
- Quarry Tile
- Cement/Epoxy Terrazzo
- Cement-Based Agglomerates
- Glazed Cement Masonry Units
- Floor Covering Adhesive and Polyurethane Adhesive residue
- Porcelain & Ceramic tiles with Glazed or Smooth surfaces
- Well-Bonded Cutback Adhesive
- Exterior Glue Plywood
- Natural Stone
- Vinyl Flooring
- VCT
- Plastic Laminate Countertops
- Resin-Backed Tile and Stone*
- Agglomerate Marble
- Ceramic Tile
- Concrete smooth and non absorbent
- Concrete with up to 20% fly ash
- Dry shake hardener
- Epoxy Coating
- Epoxy Flooring (Poured)
- Moisture Barrier (Sheet Goods)
- Non-porous Concrete
- Radiant-heated floors
- Rigid Fiberglass panels

*Light commercial applications only. See TDS 1150 for further information.

PACKAGING

- 5 Litre Pails

MANUFACTURER

LATICRETE Australia Pty Ltd
29 Telford Street
Virginia, QLD 4014 Australia

Data Sheets are subject to change without notice. For latest revision, visit www.laticrete.com.au
Approximate Coverage (varies depending on substrate)

5 Litre Pail: 18m² — 37m²

Limitations
- Interior use only
- Not for use in immersed installations or other continuous wet area applications.
- Do not install when ambient temperature or surface is expected to be below 10°C during placement or before material takes final set or when temperature will be above 35°C.
- The surface temperature of the prepared substrate must be at least 2.5°C above the dew point and rising to avoid condensation on the surface while drying.
- Surfaces must be structurally sound, clean, dry and free from bond inhibiting or bond breaking materials including; dust, dirt, waxes, release agents, grease, curing compound, oils and the like. Always test small area to verify performance and compatibility prior to installation.
- Concrete must not be subject to hydrostatic pressure.
- Maximum amount of moisture in the concrete substrate should not exceed 24g/m²/24Hrs as per ASTM F-1869 and 75% relative humidity as measured with moisture probes as per ASTM 2170.
- Do not dilute
- Do not install over any substrates, cutback adhesive, or other adhesive residue containing asbestos. Always verify it does not contain asbestos.
- When bonding to cutback adhesive or other adhesive residue, adhesive residue must be wet-scrapped to the finish of the concrete leaving only the transparent staining from the adhesive. Do not use adhesive removers, solvents or other chemicals that may penetrate into the concrete.
- Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes.
- Resin-backed tile and stone can be primed with PRIME-N-BOND™ for interior residential and light commercial applications in accordance with ASTM C627. Not for use in wet areas.
- When a waterproofing membrane is required, do not apply a LATICRETE Waterproofing Membrane directly on top of the PRIME-N-BOND™.
- Do not install PRIME-N-BOND or underlayment over particleboard, chipboard, hardboard (Masonite), Luan panels, asbestos, interior glue plywood, gypsum-based patching materials, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.

Surface Preparation
- Substrates must be by dry, clean, structurally sound, cured and free from laitance, oil and grease
- Remove substances that may act as a bond inhibitor such as oil, wax, asphalt, paint, curing compounds, sealers, etc…
- Inspect and repair cracks and joints
- Joints where movement is anticipated must be honored through the finished flooring.
- Do not use chemicals to etch or prepare surfaces
- Note: For use as a Low to No Prep Primer with LATICRETE self levelling products. Please refer to TDS 1230. Surface Prep and Primer Guide.

Mixing
Stir before use to ensure that settling has not occurred during shipment and storage. Product is ready-to-use. Do not dilute.

Application
Apply PRIME-N-BOND with a 9mm nap roller or brush. Apply a thin even film to the surface.

Drying Time
Allow PRIME-N-BOND to dry before applying a polymer modified adhesive. The minimum waiting time is 15 — 60 minutes depending on the substrate and environmental conditions. When used as primer for self-leveling cement (e.g. LEVEL) allow 2 — 5 hours for PRIME-N-BOND to dry before self-leveling cement is poured. If PRIME-N-BOND dries for more than 72 hours before application of the self-leveling cement, clean the surface, re-apply an additional coat of PRIME-N-BOND and install the self-leveling cement within 72 hours. Mix and install self-leveling cement per manufacturers product data sheet and installation instructions.

Cleaning
All tools and equipment should be cleaned promptly with water.
AVAILABILITY AND COST

Availability
LATICRETE® and LATAPOXY® materials are available worldwide.
For Distributor information:
Toll Free:  1800 331 012
Telephone:  07 3865 1599
For online distributor information, visit LATICRETE at www.laticrete.com.au

Cost
Contact a LATICRETE Distributor in your area.

MAINTENANCE

LATICRETE and LATAPOXY grouts require routine cleaning with a neutral pH detergent and water. All stone and tiles should be maintained and sealed with STONETECH® products as appropriate for the specific tile / stone and installation situation.

All other LATICRETE and LATAPOXY materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.
