# PIGMENTED, EPOXY-BASED MOISTURE VAPOR BARRIER SYSTEM

Epoxy based membrane to control moisture vapor emission rates while providing a uniform and consistent base color to receive SPARTACOTE® coating systems.

FEATURES	BENEFITS
Single coat	Simplifies and saves installation time by eliminating pigmented base coat in a SPARTACOTE® system
Short Filled Part B to receive Epoxy Pigment	Easy to use on-site color dispersion system with no measurement required
Low VOC/Low Odor	Can be applied in high profile job sites (hospital, schools, etc.)
Component of the LATICRETE® 3 year decorative finish system warranty	Application is covered under a single source system warranty
