**Intertech Flooring receives its first
LATICRETE SUPERCAP Mobile Blending Unit!**

June 11, 2013: LATICRETE[®] SUPERCAP[®], LLC, manufacturer of the revolutionary LATICRETE SUPERCAP System, announced today delivery of a new SUPERCAP Mobile Blending Unit (SMBU) to Intertech Flooring, a leading provider of commercial flooring products and services throughout Texas and the Southwest.

"This is very exciting," stated Clint Schramm, Intertech's Vice President of Marketing. "Our Pump Truck was delivered to us on Friday, May 17th and just one week later, on May 24th, we already had our first "pour" of 35,000 square feet, which took place at University Health Service's Hospital Tower in San Antonio, Texas. We know there will be more to come!"

According to John Sacco, Managing Director of LATICRETE SUPERCAP, "The combination of Intertech's new SMBU and Integrated Chiller will allow them to pump on days where temperature previously prevented them from pouring. This is just another example of how the 'Power of the Pump' can benefit a project."

LATICRETE SUPERCAP, LLC is a leading manufacturer of premium self-leveling materials for the building industry. The LATICRETE SUPERCAP System is a timesaving, cost-effective method for finishing new concrete or capping existing slabs that meet or exceed finished flooring tolerances.

LATICRETE SUPERCAP, LLC

With a LEED-qualified, low alkali, premium self-leveling, cement-based technology, operated by a patented computer-controlled mobile blending unit (MBU), the LATICRETE SUPERCAP System is installed using an exclusive Pump Truck.
