## **LATICRETE SUPERCAP Enters Into Partnership with Allegheny Contract**

**July 9, 2012:** LATICRETE<sup>®</sup> SUPERCAP<sup>®</sup>, LLC, manufacturer of the revolutionary self-leveling SUPERCAP<sup>®</sup> System, has announced that Allegheny Contract of Winchester, MA is the company's newest applicator. Allegheny Contract has been one of New England's preeminent commercial flooring contractors for more than six decades.

Allegheny became very interested in the many benefits offered by the LATICRETE SUPERCAP System. "Our surface prep division has really taken off," stated Jim Burke, President of Allegheny Contract. "Moisture mitigation in concrete is a serious issue, and the SUPERCAP System with its high-tech Pump Truck will help us to deal with that problem effectively." Burke believes that by having the Pump Truck, his company will be able to take an even greater and more proactive approach to moisture mitigation than what was being implemented in the past. .

Burke also commented that partnering with LATICRETE SUPERCAP will help Allegheny better solve any problems related to floor flatness and overall floor leveling. "By using the Pump Truck, we can save customers time dealing with those issues. Not only will having this process make Allegheny's commercial concrete jobs easier to implement, ultimately they will be more efficient and therefore more cost-effective on a long-term basis."

LATICRETE SUPERCAP is a leading manufacturer of premium self-leveling materials for the building industry. The LATICRETE SUPERCAP System is a time-saving, cost-effective method for finishing new concrete or capping existing slabs that meet or exceed finished flooring tolerances. The system consists of a LEED-qualified, low alkali, premium self-leveling, cement-based technology that is installed using a patented computer-controlled mobile blending unit.
