LEVEL Primer

LEVEL PRIMER is a premium quality, water-based primer designed to be applied prior to the installation of self-leveling underlayments & toppings. Contains acrylic polymers and selected surface activation agents which penetrate deeply into the substrate and maximize bond strength.

<tr>
<th>ADVANTAGES</th>
<th>USES</th>
</tr>
</thead>
<tbody>
<tr>
<td>▪ LEVEL PRIMER can be used on a wide range of substrates.</td>
<td>▪ Use LEVEL PRIMER when applying a self-leveling underlayment on properly prepared suitable substrates.</td>
</tr>
<tr>
<td>▪ LEVEL PRIMER may be broom, roller, or spray applied.</td>
<td>▪ Interior residential (apartments, condominiums and homes)</td>
</tr>
<tr>
<td>▪ One-component, versatile primer for a wide variety of substrates.</td>
<td>▪ Interior commercial (office buildings, hotel rooms/hallways, restaurants and cafeterias)</td>
</tr>
<tr>
<td>▪ Easy handling and application</td>
<td>▪ Interior heavy commercial (hotel lobbies, convention centers, airports, shopping malls, grocery stores and department stores)</td>
</tr>
<tr>
<td></td>
<td>▪ Interior institutional (hospitals, schools, universities, libraries and government buildings)</td>
</tr>

Packaging,
5 L can, 4 cans per carton
Pallet: 28 cartons per pallet.

Approximate Coverage*
5-6 m² per litre
*Coverage provided is approximate and is for estimation. Actual coverage may vary depends on the job-site conditions, application methods, wastages, etc

Suitable Substrates (Interior Only)
- Concrete
- Vinyl Tile
- Cement Terrazzo
- Exterior Glue Plywood
- Ceramic Tile and Stone
- Cement Mortar Beds

Shelf Life
LEVEL PRIMER should be stored in original packaging.
Use within one (1) year of date of manufacture. **Do not allow primer to freeze.**

Limitations
- Do not install over any substrates containing asbestos.
- Substrate and ambient temperatures must be between 50°F and 90°F (10°C and 32°C).
- In all cases, the surface temperature of the prepared concrete slab must be at least 2.8°C (5°F) above the dew point to avoid condensation on the concrete surface as dries.
- For moisture limits on this primer, refer to the moisture limits of the products to be applied over it
- For use only in dry, interior environment. Do not apply on the wet substrate.
- Use undiluted over moisture stable, exterior grade plywood.
- Use undiluted over dense, non-absorbent surfaces, such as epoxy moisture barrier, floor covering adhesive residue, and ceramic tile and VCT.

Cautions
Before using any product:
- Read and understand the Product Data Sheet and Safety Data Sheet
- Perform a mock-up to ensure product will perform as required.
- Check [www.laticrete.me](http://www.laticrete.me) / contact LATICRETE technical department for any technical bulletins or updated information about the product and its application.
- LEVEL PRIMER is water based and is non-hazardous under normal conditions of use. In case of skin contact, wash immediately with water.

- Wear gloves and protective goggles
- When spraying the product, avoid breathing the fine mist and use a NIOSH approved respirator
- Contact your local LATICRETE® Technical Sales Representative with any questions
- Not for submerged applications
- Keep out of reach of children

TECHNICAL DATA
Meets all Federal, State & Local requirements for VOC.
Actual field performance will depend on installation methods and site conditions.
All specifications are subject to change without notification. Technical data shown in product data sheets and technical data sheets are typical but reflect laboratory test procedures conducted in laboratory conditions. Actual field performance and test results will depend on installation methods and site conditions. Field test results will vary greatly due to variability of critical job site factors.

INSTALLATION
Surface Preparation
- Refer to TDS 230D Substrate Preparation and Primer Guide for more detailed substrate preparation instructions.
- All concrete surfaces must be mechanically abraded by shot blasting to an ICRI CSP Profile of 3 - 5.
- Clean substrate to eliminate dust, dirt, oil, grease, paint or any contaminants which may inhibit bonding. Do not use chemicals to clean substrate. Remove any loose particles by vacuuming and damp sponging.
- Inspect for contraction joints, construction joints and cracks in the substrate which may be subject to movement after installation of a self-leveling underlayment. These must be maintained as joints through the self-leveling underlayment.
- For wood substrates use 3.2# galvanized diamond metal lath or Decoupling Mat.
- Maintain substrate temperature between 5-30°C (40-90°F) and air temperature between 10–30°C (50–90°F) during installation and throughout drying. Provide adequate ventilation to ensure uniform drying.

Mixing
Level Primer is a ready to use product, mix well and use it.

Application
For proper application instructions refer to TDS 230D Substrate Preparation and Primer Guide. Field visits by LATICRETE® personnel are for the purpose of making technical recommendations only and not for supervising or providing quality control on the jobsite.
Cleaning
All tools and equipment should be cleaned promptly with water.

AVAILABILITY AND COST
Availability
LATICRETE® materials are available worldwide. For distributor information, please contact LATICRETE Telephone: For on-line distributor information, visit www.laticrete.com

Cost
Contact a LATICRETE® closer distributor to obtain complete information and cost.

WARRANTY
The supplier warrants that the product will not deteriorate under normal conditions and use. The warranty validity of one (1) year.

Contact Technical Support for further information.

MAINTENANCE
LATICRETE® products are of high quality designed to achieve lasting installations and avoid maintenance, however performance and durability may depend on properly maintaining products, depending of the cleaning products used.

TECHNICAL SERVICES
Technical assistance

Warning
The information and the instructions in the data sheet, although based on knowledge gained through years of applications, are indicative. LATICRETE® unable to directly control the installation conditions and modalities of application of products, do not assume any liability arising from theirs implementation. Those who want to use the LATICRETE® products must conduct adequate tests to determine the site specifications. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation method and site conditions.
