### FEATURES/BENEFITS
- Maximum protection against most stains
- Advanced penetrating microbond protection
- Preserves natural look of stone
- Water-based formula
- Interior and exterior

### USES
- Countertops
- Backsplashes
- Floors
- Walls

### STANDARDS/CERTIFICATIONS
- ISO 11890-2

### MANUFACTURER
LATICRETE Middle East LLC.
P.O. Box. 86028, Ras Al Khaimah
United Arab Emirates

Telephone: + 971 7 244 6396  
Fax: + 971 7 244 5915  
Internet: www.laticrete.me
Recommended Surfaces:
Natural stone and Masonry Surfaces such as:
- Honed or Textured Marble
- Textured or Veined Granite
- Limestone
- Bluestone
- Travertine
- Sandstone
- Flagstone
- Quartzite
- Saltillo Tile
Best suited for the most porous stone surfaces

Item Numbers and Packaging
Sample 2oz (59 mL)
Pint 16oz (473 mL), 12 units per Case, 1008 units per Pallet
Quart 32oz (946 mL), 6 units per Case, 600 units per Pallet
Gallon (3.8 ℓ), 4 units per Case, 160 units per Pallet
5 Gallon (18.9 ℓ), 1 units per Case, 48 units per Pallet

Approximate Coverage
- Up to 10.4 m²/473 mL for a single coat application
- Up to 21.9 m²/946 mL for a single coat application
- Up to 83.6 m²/3.8 ℓ for a single coat application
- Up to 418 m²/18.9 ℓ for a single coat application.

Expected Wear
- Up to 5 years on interior surfaces
- Up to 3 years on exterior surfaces For best results, reapply annually.

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for two (2) years if stored at temperatures >10°C and <32°C.

VOC Content
<400 g/L (excluding water) for EPA Purposes <20 g/L (including water) for LEED and U.S. State purposes (Low Solids Coating)

Storage and Handling Instructions
Avoid prolonged exposure to vapors. Use in a well-ventilated area. Do not ingest. Avoid contact with eyes and skin. KEEP OUT OF THE REACH OF CHILDREN. Do not freeze or store above 38°C. Do not mix with other chemicals. Do not release to natural waterways.

Cautions
Consult SDS for more safety information.

- Inhalation: In high concentrations, vapors may be irritating to the respiratory system.
- Skin contact: May cause skin irritation
- Eye contact: May cause eye irritation
- Ingestion: May cause discomfort if swallowed
- Keep out of reach of children.

Working Properties

| Full Cure | 24 – 72 hours |
| Surface Traffic | 6 – 8 hours |

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

INSTALLATION
Surface Preparation
Read entire label before using. Use only as directed. Always test in a small inconspicuous area with a 24 hour cure time to determine ease of application and desired results. Allow new grout installations to cure for a minimum of 72 hours prior to application. Make sure surface is clean and free of waxes and coatings. Sealer may be applied to damp surfaces one hour after standing water has been removed. Surface temperature should be between 10°C and 26°C. Ensure that the area is well-ventilated during application and until the surface is dry. Keep children and pets out of the area until treated surface is dry.

Directions
1. Ensure cap is closed and sealed, and shake well before use.
2. Mask off surfaces not intended to be treated.
3. Liberally apply an even coat of STONETECH® BulletProof Sealer using a paint pad, roller, brush or low-pressure sprayer.
4. Allow sealer to penetrate the surface for 10-15 minutes. During this time, keep the surface wet with sealer, adding more sealer as needed. DO NOT ALLOW SEALER TO COMPLETELY DRY ON THE SURFACE.
5. Thoroughly wipe dry the entire surface with clean absorbent towels.
6. A second coat may be needed for porous, absorbent surfaces. If a second coat is required, it should be applied within 30-40 minutes from the initial application as directed in steps 3-5.
7. Should a sealer residue appear, rewet the impacted section of the surface with sealer. Agitate the surface with a white nylon scrubbing pad to loosen residue and wipe dry with a clean, absorbent towel.
8. A full cure is achieved in 24-72 hours. Use of the treated surface may resume in 6-8 hours. If use of the surface must resume sooner, cover the treated surface with red rosin paper to protect it until full cure has been achieved.
9. Clean tools used during application with water.

AVAILABILITY AND COST
Availability
LATICRETE® materials are available worldwide. For distributor information, call:
Telephone: +971 7 244 6396
Fax: +971 7 244 5915

For on-line distributor information, visit LATICRETE at www.laticrete.me

Cost
Contact a LATICRETE Distributor in your area.

WARRANTY
Subject to the conditions and limitations stated below, LATICRETE Middle East LLC warrants that its products will be free from manufacturing defects and will not break down or deteriorate under normal usage for a period of one (1) year from the date of purchase when installed in accordance with the written specifications of LATICRETE and industry standard guidelines.

MAINTENANCE
Highly alkaline, acidic, ammoniated, or abrasive cleaners are not necessary for daily maintenance and may also degrade the STONETECH sealer used, adversely affecting stain resistance. Tile and stone routine cleaning with a neutral pH cleaner such as STONETECH Stone & Tile Cleaner is recommended. For tough or difficult to remove soil use STONETECH KlenzAll™ Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results.
