

# SUPER SET Tile Tonic

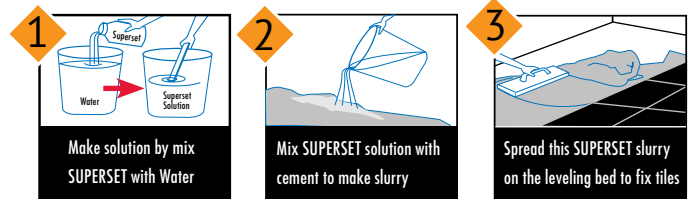

**Turns YOUR CEMENT INTO SLURRY ADHESIVE**

**DOUBLE THE STRENGTH OF CEMENT**

**Only 500ml to be mixed in water and used with 50 Kg bag of cement!**

SUPERSET is a macromolecule-based polymer concentrate to be mixed with water and used with cement for installing ceramic tile, vitrified tile and natural stone using the traditional cement slurry method of installation. It is very economical and works as a great enhancer for cement slurry bonding with tiles and stones removing the need for water curing.

### FEATURES/BENEFITS:

- C-2-SA - Turns your Cement To Slurry Adhesive
- For enhancing cement - Double the strength of cement
- Easy to use – Paste form easily dispersible in water
- Polymer based – High adhesion
- Better performance – more open time
- Highly economical

### PACKAGING:

500ML Bottles; 10 Bottles per carton, 72 cartons per pallet

### APPROXIMATE COVERAGE: 50 Kg bag of Cement will

approx.  
Cover 15-17m<sup>2</sup> for 4 mm thickness

### MIXING: C2-SA Proportion

SUPERSET mixed with water and used with cement as slurry

Cement 50 Kg: Water 19.5L : Superset 500 ML.

SUPERSET mixed with Water and used with Cement sand mix (1:6 by weight): Cement 50 Kg: Sand 300 Kg. : Water 49.5L. : Superset 500 ML.
