LATICRETE Introduces Enhanced LEED Project Certification Assistant

The most up-to-date LEED v4 information delivered quickly, concisely and accurately

March 7, 2018, Bethany, Conn. -- LATICRETE, a leading manufacturer of globally proven construction solutions for the building industry, has enhanced its LEED Project Certification Assistant— a state-of-the-art online tool for construction professionals interested in compiling points and credits for projects seeking LEED certification. The newly upgraded assistant, which is based on LEED v4, includes information on LATICRETE® products including the LATICRETE SUPERCAP® System, Tile and Stone Installation Systems, L&M™ Concrete Construction Chemicals, SPARTACOTE™ Resinous Flooring Systems, STONETECH® Surface Care and Maintenance and Masonry Veneer Installation Systems (MVIS™).

“Prior to the launch of the original LEED Project Certification Assistant in 2009, compiling the necessary data to register a project was a painstaking process that could take hours to complete. The new LEED Project Certification Assistant has been designed to make ongoing maintenance faster and easier to provide the construction industry with the most current and relevant product information available in a matter of seconds,” said LATICRETE Technical Services Manager Mitch Hawkins, who created the tool from the ground up with LATICRETE Software Developer, Dan Poincelot.

Globally Proven Construction Solutions

The enhanced LEED Project Certification Assistant can generate reports for projects very quickly, very easily, at any time, from almost anywhere.

“With specifications and LEED information offered upfront in an efficient manner, construction professionals have a much more accurate depiction of which LEED v4 credits the LATICRETE products will contribute,” added Hawkins.

The simple interface requires users to enter specific details of the project, including project name and location as well as the LATICRETE products used. Upon registering a project, a LEED v4 documentation package will be generated that includes a copy of LATICRETE Technical Data Sheet (TDS) 251 “Low VOC LATICRETE Products / LEED Certification (LEED v4), a letter outlining for LATICRETE product chosen, Health Product Declarations (HPD) if available, Environmental Product Declarations (EPD) if applicable and UL GREENGUARD Certifications if available.

###

About LATICRETE

LATICRETE is a leading manufacturer of globally proven construction solutions for the building industry. LATICRETE offers a broad range of products and systems covering tile & stone installation and care, masonry installation and care, resinous and decorative floor finishes, concrete construction chemicals, and concrete restoration and care including the LATICRETE® SUPERCAP® System. For 60 years, LATICRETE has been committed to research and development of innovative installation products, building a reputation for superior quality, performance and customer service. LATICRETE methods, materials, and technology have been field and laboratory proven by Architects, Engineers, Contractors and Owners. Offering an array of low VOC and sustainable products, LATICRETE products contribute to LEED certification, exceed commercial/residential VOC building requirements, and are backed by the most comprehensive warranties in the industry.
