SPONSOR: LATICRETE International, Inc
Bethany, CT

CONDUCTED: 2019-02-07

ON: Porcelain tile, 125 Tri Max mortar (0.25 in. trowel), Spectralock Pro grout

TEST METHODOLOGY

Riverbank Acoustical Laboratories has been accredited by the U.S. Department of Commerce, National Institute of Standards and Technology (NIST) under the National Voluntary Laboratory Accreditation Program (NVLAP) as an ISO 17025:2005 Laboratory (NVLAP Lab Code: 100227-0) and for this test procedure. The test reported in this document conformed explicitly with ASTM E2179-03 (2016): "Standard Test Method for Laboratory Measurement of the Effectiveness of Floor Coverings in Reducing Impact Sound Transmission Through Concrete Floors" The single number rating was calculated according to ASTM E989-18: "Standard Classification for Determination of Impact Insulation Class (IIC)". A complete description of the measurement procedure and room specifications are available upon request. The results presented in this report apply to the sample material as received from the test sponsor.

STANDARD CONCRETE FLOOR

The laboratory's standard concrete floor is a fully cured 152.40 mm (6.0 in.) thick concrete floor installed directly in the laboratory's 4.27 m (14.0 ft.) by 2.44 m (8 ft.) test opening. No additional ceiling materials were installed over the bottom face of the concrete.

*Note: A 0.1 mm (0.004 in.) thick polyethylene sheet was adhered with spray adhesive to the top face of the concrete slab in order to protect the slab surface.*
SPECIMEN MEASUREMENTS & TEST CONDITIONS

The test specimen was designated by the sponsor as Porcelain tile, 125 Tri Max mortar (0.25 in. trowel), Spectrallack Pro grout.
The building contractor and RAL staff compiled a detailed construction specification for the test specimen as follows, in order of installation:

**Mortar**
- **Trade Name:** Laticrete 125 Tri Max
- **Installed Thickness:** Approximately 6.35 mm (0.25 in.)
- **Installation Method:** 6.35 mm (0.25 in.) x 9.52 mm (0.375 in.) x 6.35 mm (0.25 in.) trowel
  - Trowel lines oriented parallel to length of concrete slab
- **Mix Ratio:** 4.375 L water per 11.34 kg (25 lbs) dry mortar
- **Wet Weight:** 44.57 kg (98.25 lbs)

**Tiles**
- **Material:** Porcelain
- **Tile Dimensions:** 304.8 mm (12 in.) x 304.8 mm (12 in.)
- **Tile Thickness:** 7.87 mm (0.31 in.)
- **Overall Weight:** 166.47 kg (367 lbs)
- **Installation:** Layer of mortar applied to bottom face with straight edge of trowel
  - Approximately 3.18 mm (0.125 in.) thick mortar layer on tile
  - Treated tiles laid on troweled mortar layer
  - Tiles spaced 6.35 mm (0.25 in.) apart
- **Installation Date:** 2019-01-09

**Grout**
- **Trade Name:** Laticrete Spectrallack Pro Premium Grout
- **Installation:** Inserted into gaps between tiles
- **Overall Weight:** 7.94 kg (17.5 lbs)
- **Installation Date:** 2019-01-11
Physical Measures

Size: 2.44 m (96.0 in) wide by 4.27 m (168.0 in) long
Thickness: 12.7 mm (0.5 in.)
Weight: 218.97 kg (482.75 lbs)
Transmission Area: 10.405 m² (112 ft²)
Mass per Unit Area: 21.04 kg/m² (4.31 lbs/ft²)

Test Aperture

Size: 4.27 m (14.0 ft.) by 2.44 m (8 ft.)
Filler Wall: None
Sealed: Entire periphery (both sides) with dense mastic

Test Environment

Source Room

Volume: 131.3 m³
Temperature: 22.8 °C ± 0.0 °C
Relative Humidity: 49.5 % ± 1.0 %

Receive Room

Volume: 82.64 m³
Temperature: 23.3 °C ± 0.0 °C
Relative Humidity: 48.0 % ± 2.0 %

Increase in Impact Insulation Class \( \Delta IIC = 14 \)  

Impact Insulation Class, \( IIC_c \) for \( L_{ref,c} \) \( IIC_c = 42 \)
The measured impact sound pressure levels (ISPL) are tabulated in each of the twenty-one standard one third octave bands from 100 Hz through 3150 Hz for both the standard concrete slab and the installed test specimen. The reduction in ISPL calculated for the floor covering has been applied to a reference concrete floor with an IIC = 28 as described in the standard. The increase in impact insulation class, ΔIIC as well as the IICc for the floor covering on a reference concrete slab has also been calculated. An * indicates that the value has been adjusted for background noise levels and reflects a lower limit. A graphic presentation of the data appears on the following page.
