STONETECH® BulletProof® Sealer
Penetrates into the surface to offer maximum stain protection while preserving the original look. Water-based formula for interior and exterior use.

STONETECH Heavy Duty Sealer
Provides advanced stain protection while preserving the look of natural stone surfaces. Water-based formula for interior and exterior use.

STONETECH Heavy Duty Exterior Sealer
Provides advanced protection against water-based stains on natural stone, memory and grout. Solvent-based formula for exterior use.

STONETECH Advanced Grout Sealer
Grout and seal the same day! Provides maximum stain protection against water- and oil-based stains in a convenient aerosol spray.

STONETECH Heavy Duty Grout Sealer
Provides advanced stain protection on cement-based grout. Water-based formula for exterior and exterior use.

STONETECH Stain Protecting Grout Additive
Grout and seal in one easy step! Water-based, professional grade additive provides built-in stain protection without affecting grout color.

STONETECH® Revitalizer® Cleaner & Protector
Gentle daily cleaner and protector with built-in sealers for all natural stone and grout surfaces.

STONETECH Stone & Tile Cleaner
Daily cleaner removes everyday spills and dirt on stone, tile, quartz and grout.

STONETECH DeepKlenz™ Cleaner
Maximum strength cleaner, formulated to power through the deepest dirt, grime, oil and food stains on stone, tile and grout.

STONETECH KlenzAll™ Cleaner
Heavy duty, alkaline-based formula removes tough dirt, grease and grime on stone, tile, monastery and grout.

STONETECH Restore™ Acidic Cleaner
Heavy duty strength, acidic formula removes dirt, hard water deposits, grout haze, efflorescence and rust. Great for ceramic and porcelain tile.

STONETECH Mold & Mildew Stain Remover
Cleans away unsightly mold and mildew stains without degrading stone, tile or grout.

STONETECH Soap Scum Remover
Removes stubborn soap scum, hard water stains, and dirt without scratching your natural stone, ceramic, porcelain or glass tile.

STONETECH Oil Stain Remover
The ready-to-use, problem solving solution to pull out deep-set oil stains on natural stone and grout. Just stir and apply.

STONETECH Epoxy Grout Haze & Coating Stripper
Fast-acting, water-based gel that dissolves epoxy grout haze and tough coatings in minutes.

STONETECH® Stone Polish
Adds a quick, brilliant shine to polished stone without leaving a greasy film. Great for all polished natural stone surfaces.

STONETECH Enhancer & Sealer
Deepens the natural color of stone while providing protection against stains. Water-based formula for all interior natural stone surfaces.

STONETECH Enhancer Pro® Sealer
Offers maximum stain protection and color by deepening the natural color of the stone. A solvent based formula for interior and exterior use.

STONETECH High and Semi Gloss Finishes & Sealers
Available in High Gloss or Semi Gloss finishes, these topical coatings provide shine and deepen the color of natural stone. Recommended for textured/tumbled natural stone.

STONETECH Honing and Polishing Powders
Professional restoration products available.

STONETECH® Stone Protect
Protects your investment

DOs and DON’Ts
DO use STONETECH® sealers to protect your stone, tile and grout.
DO clean up spills immediately to minimize damage to your stone, tile and grout.
DO use trivets or mats under hot dishes and cookware.
DO use place mats under china, ceramics, silver and other objects that can scratch your stone's surface.
DO place a small rug or mat at entry ways to trap dirt and sand from normal foot traffic.
DO dust or carefully vacuum counters, islands, vanities and floors frequently.
DO use counter under glasses, especially if they contain alcohol or other liquids.
DO clean surfaces regularly with STONETECH® Revitalizer® Cleaner & Protector or STONETECH® Stone & Tile Cleaner.
DO call the STONETECH Technical Support Help Line for maintenance assistance. 1.888.786.6343
DON’T wait to clean up spills on stone. Clean them up as quickly as possible.
DON’T use vinegar, bleach, ammonia, or general purpose cleaners, bathroom cleaners or tub and tile cleaners.
DON’T use abrasive cleaners such as dry cleaners or soft cleansers.
DON’T use alkaline cleaners not specifically formulated for stone.

Check out www.stonetech.com for more product solutions!
Stain Prevention – Sealers
Natural stone and grout can be very porous making it susceptible to staining. The best way to prevent stains on stone, tile or grout is to use a STONETECH® sealer. Sealers such as STONETECH BulletProof™ Sealer repel oil and water-based spills, giving you time to wipe from spills before they have a chance to penetrate your stone. Some sealers can enhance (darken) your stone while others protect the stone’s natural hue.

When applied products – ceramic and porcelain tile, are less porous and newly sealed, the grout used typically cement bound, is very porous. Penetrating great sealers such as STONETECH Advanced Great Seam work best to prevent stains and keep grout joints looking like new.

Step Away from Household Cleaners
Natural stone demands cleaning products specifically made for its unique mineral composition. STONETECH cleaners such as Revitalizer® Cleaner & Protector are designed for use on stone and grout surfaces, it gently removes soils while reinforcing the original sealers to prevent future staining. General purpose cleaners, not specifically formulated for natural stone or tile, are never recommended. They can break down the sealers, remove its protective properties and make the surface susceptible to stains. Worst yet, many cleaners include abrasives, enamels, vinegar, bleach or ammonia that can etch the polished, degrade the sealers, discolor the surface, or even scratch your stone.

Etch Marks – Those Aren’t Water Stains
While most everyday messes can generally be cleaned, highly acidic spills can etch your natural stone and tile surfaces. Spills such as orange juice and soft drinks contain acids and other ingredients that can degrade sealers or damage your stone’s surface. Whether you have natural or quartz stone slab counters, ceramic or porcelain tile counters, using STONETECH® Stone & Tile Cleaner will remove residues from cooking oils, food spills, and hairspray.

Stone and Tile Floors
Clean your interior stone and tile floors frequently using a clean, non-scratching sponge or nylon brush. Spray affected area with STONETECH Stone and Tile Cleaner. Wipe dry with a clean, dry cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

Mold and Mildew Stains
Wet and humid environments as in the bath or shower are ideal for mold and mildew growth. STONETECH Mold & Mildew Stain Remover is a penetrating, alkaline-based cleaner. It can clean the metal or plastic attachments and wheels can scratch the surface. During mopping your stone or tile floor with a properly diluted solution of a daily STONETECH Cleaner. Avoid walking until floor is completely dry, as wet stone and tile floors tend to be slippery!

Food and Drink Spills
For oil-based stains from foods like salad dressing, cooking oils, butter or some cosmetics, use STONETECH Oil Stain Remover to wick up the stain from deep within the stone.

Protector and wipe with a clean, dry cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

What to Do When a Spill Occurs
No matter how careful you are, spills are going to happen. Food and Drink Spills
For oil-based stains from foods like salad dressing, cooking oils, butter or some cosmetics, use STONETECH Oil Stain Remover to wick up the stain from deep within the stone.

Protector and wipe with a clean, dry cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

Stain Prevention — Sealers
Natural stone and grout can be very porous, making it susceptible to staining. The best way to prevent stains on stone, tile or grout is to use a STONETECH® sealer. Sealers such as STONETECH® BulletProof® Sealer repel oil and water-based spills, giving you time to wipe them away before they have a chance to penetrate your stone. Some sealers can enhance (darken) your stone while others protect the stone’s natural hue.

While acid-resistant products — ceramic and porcelain tile, are less porous and rarely need sealing, the grout used typically contains cement, is very porous. Penetrating great sealers such as STONETECH® Advanced Great Sealer work best to prevent stains and keep grout joints looking like new.

Etch Marks — Those Aren’t Water Stains
Natural stone demands cleaning products specifically made for its unique mineral composition. STONETECH® cleaners such as Revitalizer® Cleaner & Protector are designed for use on stone and grout surfaces, gently removes soils while reinforcing the original sealer to prevent future staining.

General purpose cleaners, not specifically formulated for natural stone or tile, are never recommended. They can break down the sealer, remove its protective properties and make the surface susceptible to stains. Worst yet, many cleaners include abrasives, lemon, vinegar, bleach or ammonia that can etch away the polish, degrade the sealer, discolor the surface, or even scratch your stone.

Mold and Mildew Stains
Wet and humid environments as in the bath or shower are ideal for mold and mildew growth. STONETECH® Mold & Mildew Remover can remove mold and mildew from deep within the stone.

Stone and Tile Floors
Clean your interior stone and tile floors frequently using a clean, non-treated dry dust mop, as abrasive particles of sand and dirt can damage natural stone and tile surfaces. Mats outside your entrance ways will help minimize damage. Use caution when using a vacuum cleaner as the metal or plastic attachments and wheels can scratch the surface. Damp-mop your stone or tile floor with a properly diluted solution of a daily STONETECH® Stone & Tile Cleaner. Avoid walking until floor is completely dry, as damp stone and tile floors tend to be slippery! After cleaning, use a STONETECH® Stone & Tile Cleaner & Protector and wipe with a clean, dry cloth. Repeat if necessary.

Food and Drink Spills
No matter how careful you are, spills are going to happen.

What to Do When a Spill Occurs

Food and Drink Spills
Quickly swipe up a food or spill or wipe it up with a clean, dry cloth. Spray the area with STONETECH® Revitalizer® Cleaner & Protector and wipe with a clean, dry cloth. Repeat if necessary.

Challenging Spills
Heavy traffic areas, pets and kids can result in the messiest stone and tile care challenges. Spills should be cleaned up as quickly as possible to minimize damage caused by acids. For tough to remove dirt, grime and oil stains, use STONETECH® KlenzAll™ Cleaner and reseal as needed.

Mud
Let mud stains dry completely before removing with a soft plastic or nylon brush. Spray affected areas with STONETECH Stone and Tile Cleaner. Wipe dry with a dry cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

Oily Stains
For oil-based stains from foods like salad dressing, cooking oils, butter or cream, use STONETECH® Oil Stain Remover to wipe up the stain from deep within the stone.

Mold and Mildew Stains
Wet and humid environments as in the bath or shower are ideal for mold and mildew growth. STONETECH® Mold & Mildew Stain Remover eliminates these stains off stone, tile and grout without etching the surface. Protect your investment for years to come with high-performing STONETECH care and maintenance solutions.

Visit www.stonetech.com for more information.
Stone or tile is an excellent investment and gives you years of functionality! Retain its beauty and value with simple care tips by STONETECH—high quality, safe and reliable surface care and maintenance solutions.

Stain Prevention – Sealers
Natural stone and grout can be very porous making it susceptible to staining. The best way to prevent stains on stone, tile or grout is to use a STONETECH® sealer. Sealers such as STONETECH BulletProof® Sealer repel oil and water-based spills, giving you time to wipe them away before they have a chance to penetrate your stone. Some sealers can enhance (darken) your stone while others protect the stone’s natural hue.

While like-food products—ceramic and porcelain tile, are less porous and need only sealing, the grout used typically cement based, is very porous. Penetrating grout sealers such as STONETECH Advanced Grout Sealer work best to prevent stains and keep grout pores looking like new.

Step Away from Household Cleaners
Natural stone demands cleaning products specifically made for its unique mineral composition. STONETECH cleaners such as Revitalizer® Cleaner & Protector are designed for use on stone and grout surfaces, gently removes soils while reinforcing the original sealer to prevent future staining.

General purpose cleaners, not specifically formulated for natural stone or tile, are never recommended. They can break down the sealer, remove its protective properties and make the surface susceptible to stains. Worst yet, many cleaners include abrasives, lemon, vinegar, bleach or ammonia that can etch away the polish, degrade the sealer, discolor the surface, or even scratch your stone.

Etch Marks – Those Aren’t Water Stains
While most everyday messes can generally be cleaned, highly acidic products can harm your stone or tile. Etching is a result of a chemical reaction that occurs when acid comes in contact with a susceptible stone or tile. Common acids—such as vinegar, wine, tomato products, mustard and many soft drinks can etch, dull or discolor most marble, limestone, sandstone and terrazzo. Acidic grout and concrete, and stone such as granite, slate and sandstone will typically not etch.

Sealers will give you time to wipe up the spill, but cannot stop a chemical reaction from causing an etch mark or dull spot. Remember to always use coasters and placemats on acid sensitive stones.

Maintenance
Keep your stone, tile and grout looking great with some simple precautions.

Kitchen and Bathroom Counters
Many household foods, beverages, and cosmetics can degrade grout and damage stone. Common toiletries—perfume, mouthwash and toothpaste, and foods such as orange juice and soft drinks contain acids and other ingredients that can degrade sealer or damage your stone’s surface.

Whether you have natural or quartz stone slab counters, ceramic or porcelain tile counters, using STONETECH® Stone & Tile Cleaner will remove residues from cooking oils, food spills, and hairspray.

Stone and Tile Floors
Clean your interior stone and tile floors frequently using a clean, non-abrasive cloth or sponge such as STONETECH® Stone & Tile Cleaner. Avoid direct sun and excessive water on stone and tile floors. Unsuitable cleaning methods can scratch the surface. Dirt and debris can also accumulate on the surface. For oil-based stains from foods like salad dressing, cooking oils, butter and many foods and other spills, use STONETECH® Oil Stain Remover. For tough to remove dirt, grease and grime use STONETECH® KlenzAll™ Cleaner and reseal as needed.

What to Do When a Spill Occurs
No matter how careful you are, spills are going to happen.

Food and Drink Spills
Quickly scoop up a food spill or wipe up a liquid spill with a clean, dry cloth. Spray the area with STONETECH® Revitalizer® Cleaner & Protector and wipe with a clean, dry cloth. Repeat if necessary.

Challenging Spills
Heavy traffic areas, pets and kids can result in the messiest stone and tile care challenges. Spills should be cleaned up as quickly as possible to minimize damage caused by acids. For tough to remove dirt, grease and grime use STONETECH® KlenzAll™ Cleaner and reseal as needed.

Mud
Let mud stains dry completely before removing with a soft plastic or nylon brush. Spray affected areas with STONETECH Stone and Tile Cleaner. Wipe dry with a clean cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

Oily Stains
For oil-based stains from foods like salad dressing, cooking oils, butter or some cosmetics, use STONETECH® Oil Stain Remover to wipe up the stain from deep within the stone.

Mold and Mildew Stains
Wet and humid environments as in the bath or shower are ideal for mold and mildew growth. STONETECH Mold & Mildew Stain Remover eliminates these stains off stone, tile and grout joints without etching the surface.

STONETECH® BulletProof® Sealer
Penetrates into the surface to offer maximum stain protection while preserving the original look. Water-based formula for interior and exterior use.

STONETECH® Heavy Duty Sealer
Provides advanced seal protection while preserving the look of natural stone surfaces. Water-based formula for interior and exterior use.

STONETECH® Heavy Duty Exterior Sealer
Provides advanced protection against water-based stains on natural stone, marble, and grout. Water-based formula for exterior use.

STONETECH® Advanced Grout Sealer
Great seal and seal the same day! Provides maximum stain protection against water- and oil-based stains in a convenient aerosol spray.

STONETECH® Stain Protecting Grout Additive
Provides advanced seal protection on cement based grout. Water-based formula for interior and exterior use.

STONETECH® Revitalizer® Cleaner & Protector
Gentle daily cleaner and protector with built-in sealer for all natural stone and grout surfaces.

STONETECH® Stone & Tile Cleaner
Daily cleaner removes everyday spills and dirt on stone, tile, quartz and grout.

STONETECH® DeepKlenz™ Cleaner
Maximum strength cleaner, formulated to power through the deepest dirt, grime, oil and food stains on stone, tile and grout.

STONETECH® KlenzAll™ Cleaner
Heavy duty, alkaline-based formula removes tough dirt, grease and grime on stone, tile, marble, and grout.

STONETECH® Restore™ Acidic Cleaner
Heavy duty strength, acidic formula removes dirt, hard water deposits, grout haze, efflorescence and rust. Great for ceramic and porcelain tile.

STONETECH® Mold & Mildew Stain Remover
Cleans away unsightly mold and mildew stains without degrading stone, tile or grout.

STONETECH® Soap Scum Remover
Removes stubborn soap scum, hard water stains, and dirt without scratching your natural stone, ceramic, porcelain or glass tile.

STONETECH® Oil Stain Remover
The ready-to-use, problem-solving solution to pull out deep-set oil stains on natural stone and grout. Just stir and apply.

STONETECH® Epoxy Grout Haze & Coating Stripper
Fruit-scented, water-based gel that dissolves epoxy grout haze and tough coatings in minutes.

DOs and DON'Ts

STONETECH KlenzAll™ Cleaner
Heavy duty, alkaline-based formula removes tough dirt, grease and grime on stone, tile, porcelain and grout.

STONETECH Restore™ Acidic Cleaner
Heavy duty strength, acidic formula removes dirt, hard water deposits, grout haze, efflorescence and rust. Great for ceramic and porcelain tile.

STONETECH Mold & Mildew Stain Remover
Cleans away unsightly mold and mildew stains without degrading stone, tile or grout.

STONETECH Soap Scum Remover
Removes stubborn soap scum, hard water stains, and dirt without scratching your natural stone, ceramic, porcelain or glass tile.

STONETECH Oil Stain Remover
The ready-to-use, problem solving solution to pull out deep-set oil stains on natural stone and grout. Just stir and apply.

STONETECH Epoxy Grout Haze & Coating Stripper
Fast-acting, water-based gel that dissolves epoxy grout haze and tough coatings in minutes.

STONETECH®® Stone Polish
Adds a quick, brilliant shine to polished stone without leaving a greasy film. Great for all polished natural stone surfaces.

STONETECH Enhancer & Sealer
Deepens the natural color of stone while providing protection against stains. Water-based formula for all interior natural stone surfaces.

STONETECH Enhancer Pro™ Sealer
Offers maximum stain protection and color by deepening the natural color of the stone. A solvent based formula for interior and exterior use.

STONETECH High and Semi Gloss Finish & Sealers
Available in High Gloss or Semi Gloss finishes, these topical coatings provide shine and deepen the color of natural stone. Recommended for textured/tumbled natural stone.

STONETECH Honing and Polishing Powders
Professional restoration products available.

DOs and DON'Ts

DO use STONETECH®® sealers to protect your stone, tile and grout.

DO clean up spills immediately to minimize damage to your stone, tile and grout.

DO use trivets or mats under hot dishes and cookware.

DO use place mats under china, ceramics, silver and other objects that can scratch your stone’s surface.

DO place a small rug or mat at entry ways to trap dirt and sand from normal foot traffic.

DO dust or carefully vacuum countertops, islands, vanities and floors frequently.

DO use counter under glasses, especially if they contain alcohol or other acids.

DO clean surfaces regularly with STONETECH®®® Cleaners & Protectors, or STONETECH®® Stone & Tile Cleaner.

DO call the STONETECH®® Technical Support Help Line for maintenance assistance. 1.888.786.6343

DON’T wait to clean up spills on stone. Clean them up as quickly as possible.

DON’T use wine, bleach, ammonia, or general purpose cleaners, bathroom cleaners or tub and tile cleaners.

DON’T use abrasive cleaners such as dry cleaners or soft cleaners.

DON’T use abrasive cleaners not specifically formulated for stone.

STONETECH® BufferProof® Sealer
Penetrates into the surface to offer maximum stain protection while preserving the original look. Water-based formula for interior and exterior use.

STONETECH Heavy Duty Stone Sealer
Provides advanced stone protection while preserving the look of natural stone surfaces. Water-based formula for interior and exterior use.

STONETECH Heavy Duty Exterior Sealer
Provides advanced protection against water-based stains on natural stone, marble and granite. Solvent-based formula for exterior use.

STONETECH Heavy Duty Grout Sealer
Provides advanced stain protection on cement based grout. Water-based formula for interior and exterior use.

STONETECH Stain Protecting Grout Additive
Grout and seal in one easy step! Water-based, professional grade additive provides built-in stain protection without affecting grout color.

STONETECH® Revitalizer® Cleaner & Protector
Gently clean and protect with built-in sealers for all natural stone and grout surfaces.

STONETECH Stone & Tile Cleaner
Daily cleaner removes everyday spills and dirt on stone, tile, quartz and grout.

STONETECH DeepKlenz™ Cleaner
Maximum strength cleaner, formulated to power through the deepest dirt, grime and food stains on stone, tile and grout.

STONETECH KlenzAll™ Cleaner
Heavy duty, alkaline-based formula removes tough dirt, grease and grime on stone, tile, granite and marble.

STONETECH Restore™ Acidic Cleaner
Heavy duty strength, acidic formula removes dirt, hard water deposits, grout haze, efflorescence and rust. Great for ceramic and porcelain tile.

STONETECH Mold & Mildew Stain Remover
Cleans away unsightly mold and mildew stains on stone, tile and grout. Available in ready-to-use, easy-squeeze bottles.

STONETECH Oil Stain Remover
Removes stubborn oil-based stains from stone and grout. Add to a cloth or scrubbing brush, apply and rub in. Seal after use.

STONETECH Epoxy Grout Haze & Coating Stripper
Fast-acting, water-based gel that dissolves epoxy grout haze and tough coatings in minutes.

STONETECH® Stone Polish
Add a quick, brilliant shine to polished stone without leaving a greasy film. Great for all polished natural stone surfaces.

STONETECH Enhancer & Sealer
Deposits the natural color of stone while providing protection against stains. Water-based formula for all interior natural stone surfaces.

STONETECH Enhancer Pro® Sealer
Offers maximum stain protection and color by deepening the natural color of the stone. A solvent-based formula for interior and exterior use.

STONETECH High and Semi Gloss Finish & Sealers
Available in High Gloss or Semi Gloss finishes. These topical coatings provide shine and deepen the color of natural stone. Recommended for textured/tumbled natural stone.

STONETECH® Protect & Clean Care Guide
Protect Your Investment

Check out www.stonetech.com for more product solutions!
Stain Prevention – Sealers
Natural stone and grout can be very porous making it susceptible to staining. The best way to prevent stains on stone, tile or grout is to use a STONETECH® sealer. Sealers such as STONETECH BulletProof® Sealer repel oil and water-based spills, giving you time to wipe them away before they have a chance to penetrate your stone. Some sealers can enhance (darken) your stone while others protect the stone’s natural hue.

While like-lived products – ceramic and porcelain tile, are less porous and readily seal, the grout used typically remains porous, is very porous. Penetrating grout sealers such as STONETECH Advanced Grout Sealer work best to prevent stains and keep grout joints looking like new.

Step Away from Household Cleaners
Natural stone demands cleaning products specifically made for its unique mineral composition. STONETECH cleaners such as Revolution® Cleaner & Protector are designed for use on stone and grout surfaces, it gently removes soils while reinforcing the original sealer to prevent future staining.

General purpose cleaners, not specifically formulated for natural stone or tile, are never recommended. They can break down the sealer, remove its protective properties and make the surface susceptible to stains. Worst yet, many cleaners include abrasives, lemon, vinegar, bleach or ammonia that can etch away the polish, degrade the sealer, discolor the surface, or even scratch your stone.

Etch Marks – Those Aren’t Water Stains
While most everyday messes can generally be cleaned, highly acidic products can harm your stone or tile. Etching is a result of a chemical reaction from causing an etch mark or dull spot. Remember to always use coasters and placemats on acid sensitive stones.

Maintenance
Keep your stone, tile and grout looking great with some simple precautions.

Kitchen and Bathroom Counters
Many household foods, beverages, and cosmetics can degrade grout and damage stone. Common troublemakers – perfume, mouthwash and toothpaste, and foods such as orange juice and soft drinks contain acids and other ingredients that can degrade sealer or damage your stone’s surface.

Whether you have natural or quartz stone slab counters, ceramic or porcelain tile counters, using STONETECH® Stone & Tile Cleaner will remove residues from cooking oils, food spills, and hair spray.

Stone and Tile Floors
Clean your interior stone and tile floors frequently using a clean, non-abrasive cloth with cold water. Food and drinks spills on stone and tile floors tend to be slippery! Damp-mop your stone or tile floor with a properly diluted solution of a daily STONETECH cleaner. Avoid walking until floor is completely dry, as metal or plastic attachments and wheels can scratch the surface. Use caution when using a vacuum cleaner as the metal or plastic attachments and wheels can scratch the surface. Damp-mop your stone or tile floor with a properly diluted solution of a daily STONETECH cleaner. Avoid using a vacuum cleaner as the metal or plastic attachments and wheels can scratch the surface. Damp-mop your stone or tile floor with a properly diluted solution of a daily STONETECH cleaner. Avoid walking on the floor after mopping as it can be slippery.

Bath and Other Wet Areas
For oil-based stains from foods like salad dressing, cooking oils, butter, a rich or creamy sauce, use STONETECH® Oil Remover to wipe up the stain from deep within the stone.

Mold and Mildew Stains
Wet and humid environments as in the bath or shower are ideal for mild and mildew growth. STONETECH Mold & Mildew Stain Remover eliminates these stains off stone, tile and grout without etching the surface. Protect your investment for years to come with high performing STONETECH care and maintenance solutions.

What to Do When a Spill Occurs
No matter how careful you are, spills are going to happen.

Food and Drink Spills
Quickly scoop up a food spill or wipe up a liquid spill with a clean, dry cloth. Spray the area with STONETECH® Revolution® Cleaner & Protector and wipe with a clean, dry cloth. Repeat if necessary.

Challenging Spills
Heavy traffic areas, pets and kids can result in the messiest stone and tile care challenges. Spills should be cleaned up as quickly as possible to minimize damage caused by acids. For tough to remove dirt, grime and stains use STONETECH® Revolution® Cleaner and retread as needed.

Mud
Let mud stains dry completely before removing with a soft plastic or nylon brush. Spray affected areas with STONETECH Stone and Tile Cleaner. Wipe dry with a clean cloth. Repeat if necessary. If the stain remains, contact a stone care professional.

Oil Stains
For oil-based stains from foods like salad dressing, cooking oils, butter or creamy sauces, use STONETECH® Oil Remover to wipe up the stain from deep within the stone.
