5. INSTALLATION

Surface Preparation
Read entire label before using. Use only as directed. Always test in a small inconspicuous area to determine ease of application and desired results. Make sure surface is clean, dry and free of loose debris. Surface temperature should be between 50-80°F (10 – 26°C). Avoid skin and eye contact. Wear protective eyewear, gloves, long sleeves, and long pants while handling product. Ensure work area is well-ventilated during application and until surface is dry. Keep children and pets out of the area until surface use resumes.

Directions

1. Mask off any surfaces not intended to be treated.
2. Apply an even coat of STONETECH® Grout Release with a paint pad, paintbrush, paint roller or low-pressure sprayer.
3. Allow STONETECH Grout Release to completely penetrate the surface for 5-15 minutes.
4. Wipe up all remaining grout release from the surface. Do not allow excess liquid to pool or dry on surface. Do not over apply.
5. Allow for a minimum of 4 hours cure time prior to grouting.
6. After grouting, remove excess grout. Do not allow grout to completely dry prior to removal.
7. Clean equipment with water.
8. Once grout is fully cured seal installation with an appropriate STONETECH sealer. Follow grout manufacturer’s directions for cure time.

8. MAINTENANCE

Highly alkaline, acidic, ammoniated or abrasive cleaners are not necessary for daily maintenance and may also degrade the STONETECH sealer used, adversely affecting stain resistance. Tile and stone routine cleaning with a neutral pH cleaner such as STONETECH Stone & Tile Cleaner is recommended. For tough or difficult to remove soil use STONETECH KlenzAll™ Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results. For additional information, please refer to the TDS 262 Stone and Tile Care Guide.
