3. PRODUCT DESCRIPTION
NXT Embossing Admix is specially formulated latex admix designed for use as an admixture with NXT Skim for embossing applications over non-cushion back vinyl and VCT flooring.

Uses
▪ With NXT LEVEL Skim

Advantages
▪ Increases bond strength of NXT Skim
▪ Easy to mix and apply when mixed with NXT Skim
▪ Smooth consistency

Suitable Substrates
▪ Non-cushioned sheet vinyl
▪ VCT

Packaging
4X 5QTS (4.8L) / 28 per pallet /
Part: 0903-0401-2

Use 3.5 qts (3.1 L) of NXT Embossing Admix when mixed with 10 lb (4.5 kg) bag of NXT Skim. See instructions below.

Approximate Coverage
Up to 300 ft² (27.9 m²) at Skim Depth

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for five (5) years if stored at temperatures >32°F (0°C) and <110°F (43°C).

Limitations
▪ Do not mix with any product other than NXT Skim.
▪ Do not install NXT Skim over particleboard, chipboard, hardboard (Masonite®), Luan panels, asbestos, gypsum-based patching materials, asphalt, coal tar, or lightweight insulating concrete or any other dimensionally unstable materials.
▪ NXT Skim is not recommended for steel-wheeled traffic.
▪ For interior use only.
▪ Do not install when surface temperature is below 40°F (4°C) or above 90°F (32°C).
▪ Do not install over painted surfaces.
▪ Do not exceed recommended mixing ratio as indicated in mixing instructions.
▪ Do not apply NXT® Skim over waterproofing or crack isolation membranes.
▪ Adhesives/mastics, mortars and grouts for ceramic tile, pavers, brick and stone are not replacements for waterproofing membranes. When a waterproofing membrane is required, use a LATICRETE® Waterproofing Membrane on top of the dry NXT Skim.
▪ Not for use in submerged applications.

Cautions
▪ Read and understand the Product Data Sheet and Safety Data Sheet.
▪ Check www.laticrete.com for any technical bulletins or updated information about the product and its application.
▪ Contact your local LATICRETE Technical Sales Representative with any questions.
▪ Consult SDS for safety information.
▪ During cold weather, protect finished work from traffic until fully cured.
▪ Keep out of reach of children.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation
- Clean substrate to eliminate dust, dirt, oil, grease, paint or any contaminants which may inhibit bonding. Do not use chemicals to clean substrate. Remove any loose particles and vacuum.
- Completely remove any wax or other coatings. Roughen smooth surfaces. Wash and rinse thoroughly with clean water. Allow to dry.
- Test surface bond strength of substrate. If minimum 72 psi (0.5 MPa) bond strength is not achieved or the substrate is contaminated, remove contaminants by mechanical means. Retest surface.
- Inspect for contraction joints, construction joints, and cracks in the substrate which may be subject to movement after installation of NXT™ Skim. These must be maintained as joints in the new surface.
- Maintain substrate temperature between 40°F (4°C) and 90°F (32°C) during application and air temperature between 50–90°F (10–32°C) during drying. Provide adequate ventilation to ensure uniform drying.

Mixing
Mix 3.5 qts. (3.1 L ) of NXT Embossing Admix per 10 lb. (4.5 kg) bag of NXT Skim. Add NXT Skim to NXT Embossing Admix and mix for 2-3 minutes with a heavy duty drill (650 rpm) to obtain a lump-free mix. Note: material can be re-mixed to extend pot-life but do NOT add more admix or water when re-mixing.

Application
Apply blended material to substrate with trowel at a thickness from feather-edge to 1" (25 mm) for all surfaces. After initial set of material (approx. 60 min.), remove all overlap marks, seams and inconsistencies by scraping with a steel trowel. Key in but do not over trowel. Material can be walked on after 60-100 minutes, depending on thickness.

Flooring Installation
Finished floor goods may be installed as soon as 60 minutes after application, subject to thickness, drying conditions and type of flooring materials. Always refer to finished floor manufacturer’s recommendations regarding installation instructions, restrictions, moisture conditions and compatibility. Always test performance suitability and compatibility of finished floor systems prior to their application. Sample surfaces should be installed as a field test so as to be representative of entire surface and tested for intended use.

6. AVAILABILITY AND COST

Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
- Toll Free: 1.800.243.4788
- Telephone: +1.203.393.0010
For on-line distributor information, visit LATICRETE at laticrete.com

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY

See 10. FILING SYSTEM:
- LATICRETE Product Warranty

8. MAINTENANCE

Non-finish LATICRETE and LATAPOXY installation materials require no maintenance but installation performance and durability may depend on properly maintaining products supplied by other manufacturers.

9. TECHNICAL SERVICES

Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:
- Toll Free: 1.800.243.4788, ext. 1235
- Telephone: +1.203.393.0010, ext. 1235
- Fax: +1.203.393.1948
