1. PRODUCT NAME
SPARTACOTE™ Oil Tolerant Primer

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: [laticrete.com](http://laticrete.com)

3. PRODUCT DESCRIPTION
SPARTACOTE™ Oil Tolerant Primer is a two component epoxy primer for use over concrete containing residual contamination from vegetable or petroleum oils. It provides strong substrate adhesion and inter-coat bonding when used as a primer coat in SPARTACOTE epoxy and urethane systems.

Not recommended for use as a primer direct to polyaspartic coatings.

**Uses**
- Primer for epoxy and urethane systems

**Advantages**
- Bonds to oil contaminated concrete
- Low VOC
- High solids

**Suitable Substrates**
- Concrete
- Tile
- SPARTACOTE Epoxy Floor Systems

**Packaging**
- 9804-0005-2 Full Kit: 5 gal (18.9L) Kit
- Part A: 3.2 gal (12.1L) in a 5 gal (18.9L) pail
- Part B: 1.8 gal (6.8L) in a 3.5 gal (13.2L) pail

**Approximate Coverage**

<table>
<thead>
<tr>
<th>WFT</th>
<th>DFT</th>
<th>Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>4.0 mils (0.10 mm)</td>
<td>4.0 mils (0.10 mm)</td>
<td>200 ft²/gal (4.9 m²/L)</td>
</tr>
<tr>
<td>6.0 mils (0.15 mm)</td>
<td>5.9 mils (0.15 mm)</td>
<td>150 ft²/gal (3.7 m²/L)</td>
</tr>
</tbody>
</table>

WFT = Wet Film Thickness
DFT = Dry Film Thickness

Coverage values are approximate and will vary based on surface condition, preparation methods and application technique.

**Shelf Life**
Factory sealed containers of this product are guaranteed to be of first quality for two (2) years.

**Limitations**
- Substrate temperature must be between 50ºF (10ºC) and 90ºF (32ºC)
- Ambient relative humidity must not exceed 90%
- Substrate temperature must be 5ºF (3ºC) above dew point

**Cautions**
- FOR PROFESSIONAL USE ONLY
- Thoroughly read all technical data sheets, application guidelines, warranty disclaimers and Safety Data Sheets (SDS) prior to use. Application guides are available at [www.laticrete.com](http://www.laticrete.com).

Working properties based on stated temperature and 50% RH. Changes in ambient conditions may cause times to vary.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation - Concrete
Surfaces to be coated must be thoroughly cleaned of gross contaminants and grease that may impede adhesion prior to application. Always check the surface for any bond inhibitors prior to application. Any repairs must be addressed prior to application and should be repaired in accordance with ICRI standards.

Concrete must be mechanically profiled to an ICRI CSP-3 to 5. Ensure that all surface laitance is removed prior to coating. The prepared surface should have a tensile pull-off strength of 200 psi (1.4 MPa) or greater when tested in accordance with ASTM C1583. If wet grinding, allow surface to fully dry prior to coating.

Concrete must be tested for relative humidity (RH) prior to installation of any coatings. The RH of the slab must not exceed 75% as tested per ASTM F2170. If RH measures 75% or greater, use LATICRETE® VAPOR BAN™ ER or SPARTACOTE Moisture Vapor Barrier.

After priming, SPARTACOTE Epoxy Fill Coat may be applied (see technical data sheet DS 623.3 for application instructions) to fill any substrate defects (voids, bugholes, divots, etc.) that may have been exposed during surface preparation.

Surface Preparation - Over existing tile
Refer to TDS 450: Installation Guideline for Installing SPARTACOTE over Existing Tiled Surfaces

Mixing
SPARTACOTE Oil Tolerant Primer is provided in pre-measured units and when mixed will yield 5 gal (18.9 L) of material.

Prior to mixing, mechanically mix Part A separately for 1-2 minutes to disperse any pigments or fillers which may have settled. Mix pre-measured unit of Part A with pre-measured unit of Part B for 2-3 minutes. Allow 5-10 minute induction time prior to application.

Application
SPARTACOTE Oil Tolerant Primer may be applied by brush, roller or notched squeegee. Suggested application thickness is 4-6 mils (0.1-0.2 mm). Spread primer evenly over all prepared surfaces and backroll. Do not allow the primer to puddle.

To optimize inter-coat adhesion, it is recommended to apply the subsequent coat while SPARTACOTE Oil Tolerant Primer is tacky. If this is not possible, appropriate recoat times must be observed. Exposure of the primer to direct sunlight will considerably shorten the recoat times. If recommended recoat times are exceeded, consult a LATICRETE Technical Service Representative; sanding or abrasive blasting may be required.

With all epoxies after priming and before each additional coat, examine the surface for amine blush (oily film). If present, remove by cleaning the surface with acetone.

Notes
Mock-ups and field test areas are required in order to validate performance and appearance related characteristics (including but not limited to color, inherent
surface variations, wear, anti dusting, abrasion resistance, chemical resistance, stain resistance, coefficient of friction, etc.) to ensure system performance as specified for the intended use, and to determine approval of the coating system.

Variability in job site conditions (including but not limited to surface preparation, sunlight, humidity, dew point, temperature, etc.) during application of SPARTACOTE products may lead to fisheyes, blistering, pinholes, wrinkling, or outgassing of air in the concrete and are not product defects. Double priming, shading or evening application may be required.

Cleaning
Use acetone or xylene to clean tools and equipment.

6. AVAILABILITY AND COST
Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
    Toll Free:    1.800.243.4788
    Telephone:   +1.203.393.0010

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY
See 10. FILING SYSTEM:
• DS 230.13: 1 Year Product Warranty

8. MAINTENANCE
The long term performance, appearance, and life expectancy of wear surface products are critically dependent upon a good routine maintenance program designed specifically for the installed wear surface. SPARTACOTE floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly placed walk-off mats, inside and outside, will help increase the life of the floor. Recommend maintenance program consist of frequent and thorough cleaning utilizing a neutral pH cleaner. Frequency of washing will vary depending on floor usage type, traffic and age. Please Refer to TDS 420 "SPARTACOTE Floor Maintenance Guide" available at www.laticrete.com for more information.

9. TECHNICAL SERVICES
Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:
    Toll Free:    1.800.243.4788, ext. 1235
    Telephone:   +1.203.393.0010, ext. 1235
    Fax:          +1.203.393.1948
