SPARTACOTE™ Surface Build Clear

1. PRODUCT NAME
SPARTACOTE™ Surface Build Clear

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
SPARTACOTE Surface Build Clear (formerly SPARTACOTE Surface Build Quartz) is a high performance clear multi-purpose epoxy coating. It offers excellent abrasion and chemical resistance.

Uses
- Commercial/Institutional Kitchens
- Pharmaceutical & Research Facilities
- Laboratories and Clean Rooms
- Water Treatment Plants
- Educational Facilities

Advantages
- Low VOC
- High solids, multi-purpose epoxy
- Clear high gloss finish
- Excellent chemical and abrasion resistance
- Acceptable for use in broadcast systems
- USDA compliant (FDA/CFSAN U.S. Food Code 6.101.11 Surface Characteristics)

Suitable Substrates
- Concrete

Packaging
9810-0005-2 Full Kit: 5 gal (18.9L) kit
- Part A: 3.3 gal (12.5L) in a 5 gal pail
- Part B: 1.7 gal (6.4L) in a 3.5 gal pail

Approximate Coverage

<table>
<thead>
<tr>
<th>Thickness</th>
<th>Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>15 mils (0.4 mm)</td>
<td>80-100 ft²/gal (1.9-2.5 m²/L)</td>
</tr>
</tbody>
</table>

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored off the ground in a dry area.

Limitations
- Substrate temperature must be between 50ºF (10ºC) and 90ºF (32ºC)
- Ambient relative humidity must not exceed 90%
- Substrate temperature must be 5ºF (3ºC) above dew point
- Product is not UV Stable and intended for interior applications only

Cautions
- FOR PROFESSIONAL USE ONLY
- Thoroughly read all technical data sheets, application guidelines, warranty disclaimers and Safety Data Sheets (SDS) prior to use. Application guides are available at www.laticrete.com.
- Wear protective gloves, protective clothing and eye protection.
- Causes severe skin burns. If skin irritation or rash occurs: get medical advice/attention
- Causes serious eye damage. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Call a physician immediately.
- Harmful if swallowed. Rinse mouth do not induce vomiting. Call a physician immediately.
- Keep out of reach of children.

</tbody>
</table>
Disperse any fillers which may have settled. Mix pre-measured unit of Part A separately for 1-2 minutes to prepare SPARTACOTE Surface Build Clear. Prior to mixing, mechanically mix Part A separately for 1-2 minutes to prepare the mixture.

Mixing

SPARTACOTE Surface Build Clear is provided in pre-measured units and when mixed will yield 5 gal (18.9 L) of material. Part A with pre-measured unit of Part B for 2-3 minutes. Pour mix directly onto the primed concrete.

Application

SPARTACOTE Surface Build Clear may be applied by notched squeegee or SPARTACOTE Resin Broom. Suggested application thickness is 15 mils (0.4 mm) but can be applied up to a maximum of 20 mils (0.5 mm) in a single coat. Spread evenly over all primed surfaces and immediately backroll with a spiked roller to deaerate and help level.

For broadcast systems, immediately following the backroll and while the material is still wet broadcast media with either a mechanical sprayer or by hand in a "rainfall pattern" into the wet resin to refusal or rejection.

For improved UV stability, abrasion, stain resistance, and chemical resistance a top coat is recommended. Consult a LATICRETE Technical Service Representative for best options.

To optimize inter-coat adhesion, appropriate recoat times must be observed. Exposure of the coating to direct sunlight will considerably shorten the recoat times. If recommended recoat times are exceeded, consult a LATICRETE Technical Service Representative; sanding or abrasive blasting may be required.

With all epoxies after priming and before each additional coat, examine the surface for amine blush (oily film). If present, remove by cleaning the surface with acetone.

Cleaning

Use acetone or xylene to clean tools and equipment.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation

It is recommended to prime all surfaces to be coated prior to application of SPARTACOTE Surface Build Clear. The use of a primer will increase adhesion to the substrate and reduce the occurrence of fisheyes, blistering, pinholes & outgassing. Ensure that proper re-coat windows are observed. See applicable primer technical data sheet for surface preparation requirements.

Compatible SPARTACOTE Primers:

- SPARTACOTE General Primer (DS 622.6)
- SPARTACOTE Oil Tolerant Primer (DS 622.9)
- SPARTACOTE WB Epoxy Primer (DS 085.8)
- SPARTACOTE Moisture Vapor Barrier (DS 087.5)

Surfaces to be coated must be free of grease and any other contaminants that may impede adhesion. Always check the surface for any bond inhibitors prior to application. Any repairs must be addressed prior to application and should be repaired in accordance with ICRI standards.

Concrete must be mechanically profiled to an ICRI CSP-3 to 5. Ensure that all surface laitance is removed prior to coating. The prepared surface should have a tensile pull-off strength of 200 psi (1.4 MPa) or greater when tested in accordance with ASTM C1583.

Concrete must be tested for relative humidity (RH) prior to installation of any coatings. The RH of the slab must not exceed 75% as tested per ASTM F2170. If RH measures 75% or greater, use SPARTACOTE Moisture Vapor Barrier.

Substrate defects (voids, bugholes, divots, etc.) should be filled smooth with surrounding substrate surface with SPARTACOTE Epoxy Fill Coat (see technical data sheet DS 623.3 for application instructions) prior to the application of SPARTACOTE Surface Build Clear.

Mixing

SPARTACOTE Surface Build Clear is provided in pre-measured units and when mixed will yield 5 gal (18.9 L) of material.

Prior to mixing, mechanically mix Part A separately for 1-2 minutes to disperse any fillers which may have settled. Mix pre-measured unit of Part A with pre-measured unit of Part B for 2-3 minutes. Pour mix directly onto the primed concrete.

Application

SPARTACOTE Surface Build Clear may be applied by notched squeegee or SPARTACOTE Resin Broom. Suggested application thickness is 15 mils (0.4 mm) but can be applied up to a maximum of 20 mils (0.5 mm) in a single coat. Spread evenly over all primed surfaces and immediately backroll with a spiked roller to deaerate and help level.

For broadcast systems, immediately following the backroll and while the material is still wet broadcast media with either a mechanical sprayer or by hand in a "rainfall pattern" into the wet resin to refusal or rejection.

For improved UV stability, abrasion, stain resistance, and chemical resistance a top coat is recommended. Consult a LATICRETE Technical Service Representative for best options.

To optimize inter-coat adhesion, appropriate recoat times must be observed. Exposure of the coating to direct sunlight will considerably shorten the recoat times. If recommended recoat times are exceeded, consult a LATICRETE Technical Service Representative; sanding or abrasive blasting may be required.

With all epoxies after priming and before each additional coat, examine the surface for amine blush (oily film). If present, remove by cleaning the surface with acetone.

Cleaning

Use acetone or xylene to clean tools and equipment.

6. AVAILABILITY AND COST

Availability

LATICRETE materials are available worldwide.

For Distributor Information, Call:
Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010
For on-line distributor information, visit LATICRETE at laticrete.com

Cost

7. WARRANTY
See 10. FILING SYSTEM:
- LATICRETE Product Warranty

8. MAINTENANCE
The long term performance, appearance, and life expectancy of wear surface products are critically dependent upon a good routine maintenance program designed specifically for the installed wear surface. SPARTACOTE™ floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly placed walk-off mats, inside and outside, will help increase the life of the floor. Recommend maintenance program consist on frequent and through cleaning utilizing a neutral pH cleaner. Frequency of washing will vary depending on floor usage type, traffic and age. Please Refer to TDS 420 “SPARTACOTE Floor Maintenance Guide” available at www.laticrete.com for more information.

9. TECHNICAL SERVICES
Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:
- Toll Free: 1.800.243.4788, ext. 1235
- Telephone: +1.203.393.0010, ext. 1235
- Fax: +1.203.393.1948
