1. PRODUCT NAME
SPARTACOTE™ Urethane Cement SL

2. MANUFACTURER
LATICRETE International, Inc.
1 LATICRETE Park North
Bethany, CT 06524-3423 USA
Telephone: +1.203.393.0010, ext. 1235
Toll Free: 1.800.243.4788, ext. 1235
Fax: +1.203.393.1684
Website: laticrete.com

3. PRODUCT DESCRIPTION
SPARTACOTE Urethane Cement SL is a self-leveling seamless flooring system designed for medium-duty industrial applications. Typically installed at 3/16" finished thickness, it exhibits good thermal shock, impact, abrasion and chemical resistance. The system consists of Part A & B liquids, Part C slurry powder and optional SPARTACOTE Urethane Cement Pigments.

Available colors include: Medium Grey, Dark Grey, Tan, Green, Red and Black

Uses
- Commercial Kitchens
- Food & Beverage Manufacturing
- Breweries

Advantages
- Seamless finish
- Easy self-leveling installation
- Resistant to thermal shock
- Good abrasion, impact and chemical resistance
- Low VOC, low odor

Suitable Substrates
- Concrete
- Quarry Tile

Packaging
Part A & B Liquids
9250-0001-1 Part A: 1 gal (3.7L) liquid
9252-0001-1 Part B: 1 gal (3.7 L) liquid

Part C Powders
9254-0040-1 Part C: 40 lb (18.1kg) slurry powder

Urethane Cement Pigments
9260-0001-1 Medium Grey: 1 lb (0.5kg) pigment
9261-0001-1 Dark Grey: 1 lb (0.5kg) pigment
9262-0001-1 Tan: 1 lb (0.5kg) pigment
9263-0001-1 Green: 1 lb (0.5kg) pigment
9264-0001-1 Red: 1 lb (0.5kg) pigment
9265-0001-1 Black: 1 lb (0.5kg) pigment

Approximate Coverage
<table>
<thead>
<tr>
<th>Thickness</th>
<th>Coverage</th>
</tr>
</thead>
<tbody>
<tr>
<td>1/8&quot; (3.2 mm)</td>
<td>52 ft²/unit (4.8 m²/unit)</td>
</tr>
<tr>
<td>3/16&quot; (4.8 mm) with broadcast</td>
<td>52 ft²/unit (4.8 m²/unit)</td>
</tr>
</tbody>
</table>

Shelf Life
Factory sealed containers of the following products are guaranteed to be of first quality if stored off the ground in a clean, dry area.
Urethane Cement Liquids (Parts A & B): 1 Year. Urethane Cement Powders: 6 months. Urethane Cement Pigments: N/A

Limitations
- SPARTACOTE Urethane Cement SL is not color stable unless UV resistant top-coat is used
- Do not install on wet concrete
- Floors should be properly sloped to drain to prevent standing water
- Spills should be removed as soon as possible to prevent potential hazards
- Substrate temperature must be between 40°F (4°C) and 85°F (29°C)
- Material temperature at installation must be between 50°F (10°C) and 80°F (26°C)

Cautions
- FOR PROFESSIONAL USE ONLY
- Thoroughly read all technical data sheets, application guidelines, warranty disclaimers and Safety Data Sheets (SDS) prior to use. Application guides are available at www.laticrete.com.
- Causes skin irritation
- May cause an allergic skin reaction
- Causes serious eye irritation
- Harmful if inhaled
- May cause allergy or asthma symptoms or breathing difficulties if inhaled
- May cause respiratory irritation
- Suspected of causing cancer
- May cause damage to organs through prolonged or repeated exposure
- Keep out of reach of children.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation - Concrete

SPARTACOTE Urethane Cement SL may be installed on concrete after a minimum of 7 days and/or when the concrete reaches a minimum of 3,500 psi (24.1 MPa) compressive strength which will allow for proper surface preparation. However, early curing movement, shrinkage or cracking that may occur in the concrete will be reflected through the final SPARTACOTE Urethane Cement flooring.

Surfaces to be coated must be free of grease and any other contaminants that may impede adhesion. Always check the surface for any bond inhibitors prior to application. Concrete that has been contaminated with chemicals or other foreign matter must be neutralized or removed. Any repairs must be addressed prior to application and should be repaired in accordance with ICRI standards.

Concrete must be mechanically profiled to an ICRI CSP-3 to 5. Ensure that all surface laitance is removed prior to coating. The prepared surface should have a tensile pull-off strength of 200 psi (1.4 MPa) or greater when tested in accordance with ASTM C1583.

All concrete surface irregularities, cracks, expansion joints, control joints and terminations should be properly addressed and prepared prior to application of the flooring. To prevent lifting or delamination, keyways (minimum 5/16" wide x 5/16" deep) (7.9 x 7.9 mm) must be cut at all terminations, joints, columns, doorways, walls, and drains. Moving joints and cracks will reflect through the final installed SPARTACOTE Urethane Cement SL flooring.

Concrete must be tested for moisture vapor transmission prior to installation of any coatings. The moisture vapor transmission should be 12 lbs or less per 1,000 feet over a 24 hour period, as confirmed by ASTM E-1904 calcium chloride test.

Mixing

Mix Ratio
1 gal Part A : 1 gal Part B : 40 lb Part C : 1 lb Pigment
3.8L Part A : 3.8L Part B: 18.1 kg Part C : 0.5 kg Pigment

It is very important to utilize a proper mixer and paddle to ensure a complete mix and to reduce the risk of introducing excessive air into the mixture. LATICRETE® recommends a MAN-U-FAB M-61 (1 HP) mixer with a 10-gallon (38L) pail and TR4-10 mixing arm. (www.mixall.com). An electric jiffy mixer may also be used with a 6 gallon (22.7 L) or larger bucket.

With the mixer running, pour 1 gallon (3.7L) Part A into the pail. Add 1 SPARTACOTE Urethane Powder Pigment package to Part A and mix about 15 seconds. Add 1 gallon (3.7 L) Part B to create a 1:1 ratio of A and B. Mix another 15 seconds until the powder pigment is evenly dispersed. Gradually add all contents of a SPARTACOTE Urethane Cement SL Part C Filler into the liquid mixture and blend thoroughly until all particles are wetted out, normally about two minutes.

Application

If installing an integral cove such as SPARTACOTE Urethane Cement Cove Base, installation of the cove should be done prior to applying the floor to ensure a clean transition. Refer to DS 36573.0 SPARTACOTE Urethane Cement Cove Base for instructions.

Immediately after mixing (within 3 minutes), spread the mixed SPARTACOTE Urethane Cement SL onto the floor at the desired thickness using cam rake or trowel. Lay abutting edges within 10 minutes to ensure a clean edge. Maintaining a wet edge is important in avoiding lines and ridges on the finished floor. Backroll across slurry with a spiked roller to help settle and even out the finish.

For broadcast systems, broadcast to rejection specified broadcast media (aggregate, quartz or decorative flakes) into the wet slurry. Do not broadcast onto the wet edge area until settling and backrolling is complete. Continue broadcasting until no wet areas remain. Allow floor to cure for approximately 6-8 hours to withstand foot traffic and remove all excess broadcast material and scrape the floor as required.

Apply optional topcoat if desired for improved UV stability, abrasion, stain and chemical resistance. Consult a LATICRETE Technical Service Representative for best options.

Cleaning of Tools

Clean tools with Mineral Spirits

Notes

F.7.3.12 - 0315 Data Sheets are subject to change without notice. For latest revision, visit laticrete.com. DS-35237.0-0519
Mock-ups and field test areas are required in order to validate performance and appearance related characteristics (including but not limited to color, inherent surface variations, wear, anti dusting, abrasion resistance, chemical resistance, stain resistance, coefficient of friction, etc.) to ensure system performance as specified for the intended use, and to determine approval of the coating system.

Variability in job site conditions (including but not limited to surface preparation, sunlight, humidity, dew point, temperature, etc.) during application of SPARTACOTE products may lead to fisheyes, blistering, pinholes, wrinkling, or outgassing of air in the concrete and are not product defects. Double priming, shading or evening application may be required.

6. AVAILABILITY AND COST

Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
   Toll Free: 1.800.243.4788
   Telephone: +1.203.393.0010

7. WARRANTY

See 10. FILING SYSTEM:
   - LATICRETE Product Warranty

8. MAINTENANCE

The long term performance, appearance, and life expectancy of wear surface products are critically dependent upon a good routine maintenance program designed specifically for the installed wear surface. SPARTACOTE floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly placed walk-off mats, inside and outside, will help increase the life of the floor. Recommend maintenance program consist of frequent and thorough cleaning utilizing a neutral pH cleaner. Frequency of washing will vary depending on floor usage type, traffic and age. Please Refer to TDS 420 “SPARTACOTE™ Floor Maintenance Guide” available at www.laticrete.com for more information.
