3. PRODUCT DESCRIPTION

Grout, seal and defend in one easy step with STONETECH® GroutUp™ Additive. This additive upgrades your grout's performance to prevent stains and the continuous growth of bacteria, mold and mildew. Infused with STONETECH fluoro-sealer technology, this water-based formula repels water and oil-based stains on sanded and unsanded cement-based grout. Microban® antimicrobial technology enables this additive to further inhibit the continuous growth of stain and odor causing bacteria, mold and mildew. Simply replace the water instructed for use in grout mixing prior to installation and save time necessary for post sealing.

5. INSTALLATION

Surface Preparation

Read entire label before using. Use only as directed. Ensure work area is well-ventilated during mixing and until surface is dry. Keep children and pets out of the area until surface use resumes.

Directions

1. Shake well and use STONETECH® GroutUp™ instead of water when preparing grout.
2. Prepare grout according to the grout manufacturer's recommended mixing instructions using a grout trowel or low speed mixer to achieve the appropriate grout consistency.

3. Allow the grout to stand (slake) for 10 minutes, re-mix before application.
4. Apply grout in accordance to the grout manufacturer's recommended application instructions.
5. Follow grout manufacturer's recommendations for time to traffic. Protect grout from water immersion or freezing for 14 days, or per grout manufacturer's instructions, whichever is longer.

8. MAINTENANCE

Tile and stone routine cleaning with a neutral pH cleaner such as STONETECH® Stone & Tile Cleaner is recommended. For tough or difficult to remove soil use STONETECH KlenzAll™ Cleaner, a nylon scrubbing pad or a long handled stiff bristle brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results. For additional information, please refer to the TDS 262 Stone and Tile Care Guide.
