3. PRODUCT DESCRIPTION
SPARTACOTE Urethane Floor Sealer WB is a two component, waterborn aliphatic floor coating. Intended for use as a top coat over SPARTACOTE resinous coating systems (epoxy, urethane or polyaspartic), this product offers excellent resistance to UV discoloration, impact & abrasion, and staining. It is available in either a clear satin or clear matte finish.

Uses
▪ Research facilities
▪ Laboratories
▪ Food & Beverage Facilities
▪ Hospitals

Advantages
▪ User friendly
▪ Field and shop application
▪ Low odor, low VOC’s
▪ Excellent adhesion, chemical and abrasion resistance
▪ Soap and water clean up
▪ Excellent UV resistance

Suitable Substrates
▪ SPARTACOTE Epoxy Floor Systems
▪ SPARTACOTE Polyaspartic Floor Systems

Packaging
▪ 9802-0002-2 (Satin) Full Kit: 2 gal (7.6L) kit
▪ 9803-0002-2 (Matte) Full Kit: 2 gal (7.6L.) kit.
▪ Part A: 1.5 gal (5.7L) in a 2 gal (7.6L) pail
▪ Part B: 0.5 gal (1.9L) in a 1 gal (3.8L) can

Approximate Coverage

</tbody>
</table>

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for one (1) year if stored off the ground in a dry area.

Limitations
▪ Substrate temperature must be between 50ºF (10ºC) and 90ºF (32ºC)
▪ Ambient relative humidity must not exceed 90%
▪ Substrate temperature must be 5ºF(3ºC) above the dew point
▪ Intended for interior applications only
▪ Protect from freezing

Cautions
▪ FOR PROFESSIONAL USE ONLY
▪ Thoroughly read all technical data sheets, application guidelines, warranty disclaimers and Safety Data Sheets (SDS) prior to use. Application guides are available at www.laticrete.com.
▪ Wear protective gloves, protective clothing and eye protection.
▪ May cause an allergic skin reaction. If skin irritation or rash occurs: get medical advice/attention
▪ Causes serious eye irritation. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do.
▪ If swallowed: Rinse mouth do not induce vomiting. Call a physician immediately.
▪ Keep out of reach of children.
▪ Harmful if inhaled. May cause respiratory irritation.

Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on installation methods and site conditions.

5. INSTALLATION

Surface Preparation
SPARTACOTE Urethane Floor Sealer WB is intended for use as a top coat over SPARTACOTE resinous coating systems. Ensure that proper recoat windows are observed. See applicable primer or body coat product technical data sheet for surface preparation requirements.

Mixing
SPARTACOTE Urethane Floor Sealer WB is provided in premeasured units and when mixed will yield 2 gal (7.6L) of material. Prior to mixing, mechanically mix Part A separately for 1-2 minutes to disperse any pigments or fillers which may have settled. Mix pre-measured unit of Part A with pre-measured unit of Part B for 2-3 minutes.

Application
SPARTACOTE Urethane Floor Sealer WB may be applied by applied by brush, roller or squeegee. Suggested application thickness is 6-8 mils (0.15-0.2 mm). Spread evenly over all surfaces and immediately backroll with a short nap roller to help level.

To optimize inter-coat adhesion, appropriate recoat times must be observed. Exposure of the coating to direct sunlight will considerably shorten the recoat times. If recommended recoat times are exceeded, consult a LATICRETE Technical Service Representative; sanding or abrasive blasting may be required.

With all epoxies after priming and before each additional coat, examine the surface for amine blush (oily film). If present, remove by cleaning the surface with acetone.

Notes
Mock-ups and field test areas are required in order to validate performance and appearance related characteristics (including but not limited to color, inherent surface variations, wear, anti dusting, abrasion resistance, chemical resistance, stain resistance, coefficient of friction, etc.) to ensure system performance as specified for the intended use, and to determine approval of the coating system.

Variability in job site conditions (including but not limited to surface preparation, sunlight, humidity, dew point, temperature, etc.) during application of SPARTACOTE products may lead to fisheyes, blistering, pinholes, wrinkling, or outgassing of air in the concrete and are not product defects. Double priming, shading or evening application may be required.

Cleaning
Clean all tools and equipment immediately after use with warm water and detergent. Acetone may be used as a final rinse.

6. AVAILABILITY AND COST

Availability
LATICRETE materials are available worldwide.

For Distributor Information, Call:
Toll Free: 1.800.243.4788
Telephone: +1.203.393.0010
For on-line distributor information, visit LATICRETE at laticrete.com

Cost
Contact a LATICRETE Distributor in your area.

7. WARRANTY
See 10. FILING SYSTEM:
- LATICRETE Product Warranty

8. MAINTENANCE

The long-term performance, appearance, and life expectancy of wear surface products are critically dependent upon a good routine maintenance program designed specifically for the installed wear surface. SPARTACOTE floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly placed walk-off mats, inside and outside, will help increase the life of the floor. Recommend maintenance program consist of frequent and thorough cleaning utilizing a neutral pH cleaner. The frequency of washing will vary depending on floor usage type, traffic, and age. Please Refer to TDS 420 “SPARTACOTE Floor Maintenance Guide” available at www.laticrete.com for more information.

9. TECHNICAL SERVICES

Technical Assistance
Information is available by calling the LATICRETE Technical Service Hotline:
Toll Free: 1.800.243.4788, ext. 1235
