8. MAINTENANCE

Highly alkaline, acidic, ammoniated, or abrasive cleaners are not necessary for daily maintenance and may also degrade the sealer used, adversely affecting stain resistance. LATICRETE® Tile and stone routine cleaning with a neutral pH cleaner such as LATICRETE® Stone & Tile Floor Cleaner is recommended. For tough or difficult to remove soil use Heavy Duty Stone & Tile Floor Cleaner and a stiff nylon brush. Please note: Prior to using any cleaning material on a tile, stone, etc. installation, test a discrete area or scrap piece of tile to insure desired results.
