SAFETY DATA SHEET

1. Identification

Product identifier L&M™ EZ™ Strip
Other means of identification None.
Recommended use Concrete form release.
Recommended restrictions None known.

Manufacturer/Importer/Supplier/Distributor information
Company Name LATICRETE International
Address 1 Laticrete Park, N
Bethany, CT 06524
Telephone (203)-393-0010
Contact person Steve Fine
Website www.laticrete.com
Emergency phone number Call CHEMTREC day or night
USA/Canada - 1.800.424.9300
Mexico - 1.800.681.9531
Outside USA/Canada
1.703.527.3887

2. Hazard(s) identification

Physical hazards Not classified.
Health hazards Specific target organ toxicity, single exposure Category 3 respiratory tract irritation
Aspiration hazard Category 1
Environmental hazards Not classified.

Label elements
Signal word Danger
Hazard statement May cause respiratory irritation. May be fatal if swallowed and enters airways.
Precautionary statement
Prevention Avoid breathing mist or vapor. Use only outdoors or in a well-ventilated area.
Response IF INHALED: Remove person to fresh air and keep comfortable for breathing. IF SWALLOWED: Immediately call a POISON CENTER/doctor. Do NOT induce vomiting.
Storage Store in a well-ventilated place. Keep container tightly closed. Store locked up.
Disposal Dispose of contents/container in accordance with local/regional/national/international regulations.
Other hazards None known.
Supplemental information Not applicable.

3. Composition/information on ingredients

Mixtures
Chemical name Petroleum distillates, hydrotreated light naphthenic
CAS number 64742-53-6
% 100

Composition comments All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.
4. First-aid measures

**Inhalation**
Remove victim to fresh air and keep at rest in a position comfortable for breathing. Get medical attention if any discomfort continues.

**Skin contact**
Wash off with soap and water. Get medical attention if irritation develops or persists.

**Eye contact**
Rinse with water. Remove contact lenses, if present and easy to do. Get medical attention if irritation develops or persists.

**Ingestion**
Rinse mouth. Do not induce vomiting. If vomiting occurs, keep head low so that stomach content doesn't get into the lungs. If swallowed: Immediately call a poison center/doctor.

**Most important symptoms/effects, acute and delayed**
Exposure may cause temporary irritation, redness, or discomfort. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.

**Indication of immediate medical attention and special treatment needed**
Provide general supportive measures and treat symptomatically.

**General information**
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

**Suitable extinguishing media**
Water spray, foam, dry powder or carbon dioxide.

**Unsuitable extinguishing media**
Do not use water jet as an extinguisher, as this will spread the fire.

**Specific hazards arising from the chemical**
By heating and fire, irritating vapors/gases may be formed.

**Special protective equipment and precautions for firefighters**
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

**Fire fighting equipment/instructions**
Selection of respiratory protection for firefighting: follow the general fire precautions indicated in the workplace.

**General fire hazards**
Move containers from fire area if you can do so without risk. Use water spray to cool unopened containers.

6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**
Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Ensure adequate ventilation.

**Methods and materials for containment and cleaning up**
Large Spills: Stop the flow of material, if this is without risk. Dike the spilled material, where this is possible. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

Never return spills in original containers for re-use. For waste disposal, see Section 13 of the SDS.

**Environmental precautions**
Do not discharge into drains, water courses or onto the ground.

7. Handling and storage

**Precautions for safe handling**
Avoid prolonged exposure. Do not breathe mist or vapor. Do not get in eyes, on skin, on clothing. Use with adequate ventilation. Wear appropriate personal protective equipment. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities**
Keep container tightly closed. Store in a cool and well-ventilated place. Store away from incompatible materials (See Section 10).

8. Exposure controls/personal protection

**Occupational exposure limits**

Biological limit values
No biological exposure limits noted for the ingredient(s).

Appropriate engineering controls
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level.

Individual protection measures, such as personal protective equipment

Eye/face protection
Wear safety glasses with side shields (or goggles).

Skin protection
Hand protection
Wear appropriate chemical resistant gloves. Nitrile gloves are recommended.

Other
Wear appropriate chemical resistant clothing.

Respiratory protection
In case of insufficient ventilation, wear suitable respiratory equipment.

Thermal hazards
Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations
Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants.

9. Physical and chemical properties

Appearance
Physical state
Liquid.
Form
Liquid.
Color
Clear amber.

Odor
No data available.

Odor threshold
Not available.

pH
No data available.

Melting point/freezing point
Not applicable.

Initial boiling point and boiling range
550 °F (287.78 °C)

Flash point
280.0 °F (137.8 °C)

Evaporation rate
Not applicable.

Flammability (solid, gas)
Not applicable.

Upper/lower flammability or explosive limits
Flammability limit - lower (%)
Not available.
Flammability limit - upper percentage: Not available.
Vapor pressure: Not applicable.
Vapor density: 9 (Air=1)
Relative density: 0.89
Solubility(ies)
   Solubility (water): Insoluble in water.
Partition coefficient (n-octanol/water): No data available.
Auto-ignition temperature: Not available.
Decomposition temperature: Not available.
Viscosity: 9.29 mm²/s
Other information
   Explosive properties: Not explosive.
   Oxidizing properties: Not oxidizing.

10. Stability and reactivity
Reactivity: The product is stable and non-reactive under normal conditions of use, storage and transport.
Chemical stability: Material is stable under normal conditions.
Possibility of hazardous reactions: Will not occur.
Conditions to avoid: Heat, flames and sparks. Contact with incompatible materials.
Incompatible materials: Acids. Strong oxidizing agents, such as liquid chlorine, concentrated oxygen, sodium hypochlorite, calcium hypochlorite, etc.
Hazardous decomposition products: Carbon oxides. Smoke.

11. Toxicological information
Information on likely routes of exposure
   Inhalation: May cause respiratory tract irritation.
   Skin contact: Prolonged exposure may cause skin irritation.
   Eye contact: Direct contact with eyes may cause temporary irritation.
   Ingestion: May cause discomfort if swallowed.
Symptoms related to the physical, chemical and toxicological characteristics: Exposure may cause temporary irritation, redness, or discomfort. Droplets of the product aspirated into the lungs through ingestion or vomiting may cause a serious chemical pneumonia.
Information on toxicological effects
Acute toxicity: May cause discomfort if swallowed.
Skin corrosion/irritation: Prolonged or repeated contact may dry skin and cause dermatitis.
Serious eye damage/eye irritation: May cause eye irritation.
Respiratory or skin sensitization
   Respiratory sensitization: No data available.
   Skin sensitization: Not a skin sensitizer.
Germ cell mutagenicity: No data available to indicate product or any components present at greater than 0.1% are mutagenic or genotoxic.
Carcinogenicity: Not classified.
   ACGIH Carcinogens
      Petroleum distillates, hydrotreated light naphthenic (CAS 64742-53-6) A4 Not classifiable as a human carcinogen.
   Canada - Manitoba OELs: carcinogenicity
      Petroleum distillates, hydrotreated light naphthenic (CAS 64742-53-6) Not classifiable as a human carcinogen.
IARC Monographs. Overall Evaluation of Carcinogenicity

Petroleum distillates, hydrotreated light naphthenic (CAS 64742-53-6)

Reproductive toxicity
No data available.

Specific target organ toxicity - single exposure
May cause respiratory irritation.

Specific target organ toxicity - repeated exposure
No data available.

Aspiration hazard
May be fatal if swallowed and enters airways.

Chronic effects
Prolonged exposure may cause chronic effects.

Further information
Prolonged or repeated contact with skin may cause redness, itching, irritation, eczema/chapping and oil acne.

12. Ecological information

Ecotoxicity
Oil spills are generally hazardous to the environment.

Persistence and degradability
The product is not expected to be readily biodegradable.

Bioaccumulative potential
No data available.

Mobility in soil
The product is insoluble in water.

Other adverse effects
No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions
Dispose in accordance with all applicable regulations.

Local disposal regulations
Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers retain product residue, follow label warnings even after container is emptied. Dispose of in accordance with local regulations.

Hazardous waste code
The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Waste from residues / unused products
Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions). Avoid discharge into water courses or onto the ground.

Contaminated packaging
Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.

14. Transport information

TDG
Not regulated as dangerous goods.

IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not established.

15. Regulatory information

Canadian regulations

Controlled Drugs and Substances Act
Not regulated.
Export Control List (CEPA 1999, Schedule 3)  
Not listed.

Greenhouse Gases  
Not listed.

Precursor Control Regulations  
Not regulated.

International regulations  
Stockholm Convention  
Not applicable.

Rotterdam Convention  
Not applicable.

Kyoto protocol  
Not applicable.

Montreal Protocol  
Not applicable.

Basel Convention  
Not applicable.
