1. Identification

Product identifier          Spartacote Fast Fix Part A
Other means of identification  None.
Recommended use             Repair product.
Recommended restrictions    None known.

Manufacturer/Importer/Supplier/Distributor information

Company name                LATICRETE International
Address                      1 Laticrete Park, N
                              Bethany, CT 06524
Telephone                    (203)-393-0010
Contact person               Steve Fine
Website                      www.laticrete.com
Emergency phone number      Call CHEMTREC day or night
                              USA/Canada - 1.800.424.9300
                              Mexico - 1.800.681.9531
                              Outside USA/Canada
                              1.703.527.3887

2. Hazard(s) identification

Physical hazards             Not classified.
Health hazards               Acute toxicity, inhalation       Category 4
                              Skin corrosion/irritation      Category 2
                              Serious eye damage/eye irritation  Category 2
                              Sensitization, respiratory      Category 1
                              Sensitization, skin             Category 1
                              Carcinogenicity                 Category 2
                              Specific target organ toxicity following single
                              exposure                         Category 3 respiratory tract irritation
                              Specific target organ toxicity following repeated exposure  Category 2 (Respiratory tract, Lung)

OSHA defined hazards         Not classified.

Label elements

Signal word                  Danger
Hazard statement             Harmful if inhaled. Causes skin irritation. Causes serious eye irritation. May cause allergy or asthma symptoms or breathing difficulties if inhaled. May cause an allergic skin reaction. Suspected of causing cancer. May cause respiratory irritation. May cause damage to organs (Respiratory tract, Lung) through prolonged or repeated exposure.

Precautionary statements

Prevention                   Obtain special instructions before use. Do not handle until all safety precautions have been read and understood. Do not breathe mist or vapour. Wear protective gloves/protective clothing/eye protection/face protection. In case of inadequate ventilation wear respiratory protection. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Use only outdoors or in a well-ventilated area.
Response
If exposed or concerned: Get medical advice/attention. If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists: Get medical advice/attention. If inhaled: If breathing is difficult, remove person to fresh air and keep comfortable for breathing. If experiencing respiratory symptoms: Call a poison center/doctor.

Storage
Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
None known.

Supplemental information
None.

3. Composition/information on ingredients

Mixtures

<table>
<thead>
<tr>

<td>101-68-8</td>
<td>40 - 70</td>
</tr>
</tbody>
</table>

Composition comments
All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

Note: CAS 101-68-8 is an MDI isomer that is part of CAS 9016-87-9.

4. First-aid measures

Inhalation
Remove victim to fresh air and keep at rest in a position comfortable for breathing. Oxygen or artificial respiration if needed. Do not use mouth-to-mouth method if victim inhaled the substance. Induce artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. Get medical attention immediately.

Skin contact
Immediately flush skin with plenty of water. Take off contaminated clothing and wash before reuse. In case of rashes, wounds or other skin disorders: Seek medical attention and bring along these instructions.

Eye contact
Immediately rinse mouth and drink plenty of water. Keep person under observation. If person becomes uncomfortable take to hospital along with these instructions.

Ingestion
Irritating to eyes, respiratory system and skin. Sensitisation. Be aware that symptoms of lung oedema (shortness of breath) may develop up to 24 hours after exposure.

Most important symptoms/effects, acute and delayed
Treat symptomatically. Symptoms may be delayed.

Indication of immediate medical attention and special treatment needed
Ensure that medical personnel are aware of the material(s) involved, and take precautions to protect themselves.

5. Fire-fighting measures

Suitable extinguishing media
Water fog. Foam. Dry chemical powder. Carbon dioxide (CO2).

Unsuitable extinguishing media
Do not use water jet as an extinguisher, as this will spread the fire.

Specific hazards arising from the chemical
During fire, gases hazardous to health may be formed.

Special protective equipment and precautions for firefighters
Self-contained breathing apparatus and full protective clothing must be worn in case of fire.

Fire fighting equipment/instructions
In case of fire and/or explosion do not breathe fumes. Move containers from fire area if you can do so without risk.

General fire hazards
No unusual fire or explosion hazards noted.
6. Accidental release measures

**Personal precautions, protective equipment and emergency procedures**

- Keep unnecessary personnel away. Wear appropriate protective equipment and clothing during clean-up. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Ensure adequate ventilation. Local authorities should be advised if significant spillages cannot be contained.

**Methods and materials for containment and cleaning up**

- Large Spills: Stop the flow of material, if this is without risk. Absorb in vermiculite, dry sand or earth and place into containers. Following product recovery, flush area with water.

- Small Spills: Wipe up with absorbent material (e.g. cloth, fleece). Clean surface thoroughly to remove residual contamination.

**Environmental precautions**

Never return spills in original containers for re-use. For waste disposal, see section 13 of the SDS.

**Environmental manager must be informed of all releases.**

7. Handling and storage

**Precautions for safe handling**

- Avoid contact with skin, eyes and clothing. Avoid breathing mist or vapour. Persons susceptible for allergic reactions should not handle this product. Do not handle until all safety precautions have been read and understood. Provide adequate ventilation. Observe good industrial hygiene practices.

**Conditions for safe storage, including any incompatibilities**

- Keep container tightly closed. Store in a well-ventilated place. Store away from incompatible materials.

8. Exposure controls/personal protection

**Occupational exposure limits**

**US. OSHA Table Z-1 Limits for Air Contaminants (29 CFR 1910.1000)**

**Biological limit values**
No biological exposure limits noted for the ingredient(s).

**Exposure guidelines**

**US ACGIH Threshold Limit Values: Skin designation**
Solvent Naptha (petroleum), Heavy Aromatic (CAS 64742-94-5) Can be absorbed through the skin.

**Appropriate engineering controls**
Good general ventilation (typically 10 air changes per hour) should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. Provide eyewash station.

**Individual protection measures, such as personal protective equipment**
- **Eye/face protection**
  Wear safety glasses with side shields (or goggles).
- **Skin protection**
  - **Hand protection**
    Wear appropriate chemical resistant gloves.
- **Skin protection**
  - **Other**
    Wear appropriate chemical resistant clothing.
- **Respiratory protection**
  In case of insufficient ventilation, wear suitable respiratory equipment.
- **Thermal hazards**
  Wear appropriate thermal protective clothing, when necessary.

**General hygiene considerations**
Keep away from food and drink. Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

**9. Physical and chemical properties**

- **Appearance**
  Brown liquid.
- **Physical state**
  Liquid.
- **Form**
  Liquid.
- **Colour**
  Brown.
- **Odour**
  Hydrocarbon-like.
- **Odour threshold**
  Not available.
- **pH**
  Not available.
- **Melting point/freezing point**
  Forms crystals below 10°C.
- **Initial boiling point and boiling range**
  Decomposes prior to boiling.
- **Flash point**
  > 204.0 °C (> 399.2 °F) Closed cup
- **Evaporation rate**
  Not available.
- **Flammability (solid, gas)**
  Not available.
- **Upper/lower flammability or explosive limits**
  - **Flammability limit - lower (%)**
    Not available.
  - **Flammability limit - upper (%)**
    Not available.
- **Vapour pressure**
  < 0.00001 mm Hg (25 °C)
- **Vapour density**
  8.5
Relative density  1.24 (20° C)
Solubility(ies)
Solubility (water)  Reacts with water.
Partition coefficient (n-octanol/water)  Not available.
Auto-ignition temperature  Not available.
Decomposition temperature  Not available.
Viscosity  Not available.
Other information
Dynamic viscosity  100 - 150 cPs @ 25 °C
Explosivity  Not explosive.

10. Stability and reactivity

Reactivity  Diisocyanates react with many materials and the rate of reaction increases with temperature as well as increased contact; these reactions can become violent. Contact is increased with stirring or if the other material mixes with the diisocyanate. Diisocyanates are not soluble in water and sink to the bottom, but react slowly at the interface. The reaction forms carbon dioxide gas and a layer of solid polyurea. Reaction with water will generate carbon dioxide and heat.

Chemical stability  The product is stable under normal conditions of use, storage and transport.
Possibility of hazardous reactions  Hazardous polymerisation can occur.
Conditions to avoid  High temperatures.

11. Toxicological information

Information on likely routes of exposure
Inhalation  May cause irritation to the respiratory system. Harmful if inhaled.
Skin contact  Causes skin irritation.
Eye contact  Causes serious eye irritation.
Ingestion  Ingestion may cause irritation and malaise.

Symptoms related to the physical, chemical and toxicological characteristics  Irritating to eyes, respiratory system and skin. Sensitisation. Be aware that symptoms of lung oedema (shortness of breath) may develop up to 24 hours after exposure.

Information on toxicological effects
Acute toxicity  Harmful if inhaled.

12. Ecological information

**Ecotoxicity**

The product is not classified as environmentally hazardous. However, this does not exclude the possibility that large or frequent spills can have a harmful or damaging effect on the environment.

**Persistence and degradability**

In the atmospheric environment, material is expected to have a short tropospheric half-life, based on calculations and by analogy with related diisocyanates.

**Bioaccumulative potential**

Bioconcentration potential is low (BCF < 100 or Log Pow < 3).

**Mobility in soil**

No data available.

**Mobility in general**

The product is insoluble in water.

**Other adverse effects**

Material reacts with water.

13. Disposal considerations

**Disposal instructions**

Collect and reclaim or dispose in sealed containers at licensed waste disposal site. Do not allow this material to drain into sewers/water supplies. Do not contaminate ponds, waterways or ditches with chemical or used container. Dispose of contents/container in accordance with local/regional/national/international regulations.

**Hazardous waste code**

The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

**Waste from residues / unused products**

Dispose of in accordance with local regulations. Empty containers or liners may retain some product residues. This material and its container must be disposed of in a safe manner (see: Disposal instructions).

**Contaminated packaging**

Empty containers should be taken to an approved waste handling site for recycling or disposal. Since emptied containers may retain product residue, follow label warnings even after container is emptied.
14. Transport information

DOT
Not regulated as dangerous goods.

IATA
Not regulated as dangerous goods.

IMDG
Not regulated as dangerous goods.

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not available.

15. Regulatory information

US federal regulations
This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

TSCA Section 12(b) Export Notification (40 CFR 707, Subpt. D)
Not regulated.

OSHA Specifically Regulated Substances (29 CFR 1910.1001-1050)
Not regulated.

CERCLA Hazardous Substance List (40 CFR 302.4)
