# H₂Ope Waterproofing Membrane

**FEATURES/BENEFITS**
- No primer required on the substrate before application.
- Can be applied on damp–not moist—substrates.
- Non-toxic; ideal for potable water uses.
- Install tile, brick and stone directly onto membrane.
- Smooth & creamy. Easy to apply.
- Good climate resistance.

**USES**
- Recommended for wall & floor in wet areas such as toilets, bathrooms, and kitchen.
- For cellar walls
- Balconies and terraces

**MANUFACTURER/DISTRIBUTED BY**
LATICRETE South East Asia Pte Ltd (Level 2, A3)
No. 38 Sungei Kadut, Street 2, Singapore 729245
Telephone: +65 6515 3028 Fax: +65 6515 3037
Internet: se.laticrete.com

**STANDARDS/CERTIFICATIONS**
- ANSI 118.10, American National Standard Specifications for Load Bearing, Bonded, Waterproof Membranes for Thinset Ceramic Tile and Dimension Stone Installation
- ASTM D412
- ASTM D4541
- ASTM D2240
- ASTM C836

---

This product has been certified green under Singapore Green Building Council.
Suitable Substrates
- Concrete
- Cement Mortar Beds
- Cement Backer Board**
- Gypsum Wallboard*
- Concrete Masonry
- Cement Terazzo
- Brick Masonry
- Cement Plaster
* Interior use only.
** Consult cement backer board manufacturer and LATICRETE Technical Department for specific installation recommendations and to verify acceptability for exterior use.

Packaging
1 set (36kgs/set) consists of:
1 pallet of 16ℓ liquid
1 bag of 20kg powder

Approximate Coverage
20 kgs of H2Opef Waterproofing Membrane (powder) with 16ℓ of H2Opef Waterproofing Membrane (liquid) can yield approximately 32.3 m² with 2 coats.

Shelf Life
Factory sealed containers of this product are guaranteed to be of first quality for one (1) year* for powder & two (2) years* for liquid if stored off the ground in a dry area at temperatures >0°C and <40°C. * High humidity will reduce the shelf life of bagged product.

Limitations
- DO NOT bond to particle board, luan, Masonite or hardwood surfaces.
- DO NOT use over dynamic expansion joints, structural cracks or cracks with vertical differential movement
- DO NOT use over cracks >3mm in width.
- DO NOT use as a vapor barrier (especially in steam rooms).
- DO NOT expose to negative hydrostatic pressure, excessive vapor transmission, rubber solvents or ketones.
- DO NOT expose unprotected membrane to sun or weather for more than 30 days.
- Must be covered with ceramic tile, stone, brick, concrete, sreads, terazzo or other traffic-bearing finish. Use protection board for temporary cover.
- Consult technical service if to be used as a primary waterproofing membrane over occupied space.

Note: Surfaces must be structurally sound, stable and rigid enough to support ceramic/stone tile, thin brick and similar finishes. Substrate deflection under all live, dead and impact loads, including concentrated loads, must not exceed L/360 for thin bed ceramic tile/brick installations or L/480 for thin bed stone installations where L=span length.

Cautions
Consult MSDS for more safety information.
- During wet weather, protect finished work until fully cured.
- May irritate eyes and skin. Avoid contact with eyes or prolonged contact with skin. In case of contact, flush thoroughly with water.
- Do not take internally.
- Keep out of reach of children.

*Specifications subject to change without notification. Results shown are typical but reflect test procedures used. Actual field performance will depend on the type of tile/stone/brick used, installation methods and site conditions.

INSTALLATION
Surface Preparation
Surface temperature must be 8°C - 35°C during application and for 24 hours after installation. All substrates must be structurally sound, clean and free of dirt, oil, grease, paint, laitance, efflorescence, concrete sealers or curing compounds. Make rough or uneven concrete smooth to a wood float or better finish with a LATICRETE underlayment. Do not level with gypsum or asphalt based product. Dampen hot, dry surfaces and sweep off excess water—installation may be made on a damp surface.

All slabs must be plumb and true to within 6mm in 3m. Expansion joints shall be provided through the tile work from all construction or expansion joints in the substrate. Follow ANSI Specification A108.01-3.7 “Requirements for Expansion Joints” or TCA Details EI-171 “Expansion Joints”. Do not cover expansion joints with waterproof.

Mixing
Place 16 liters (1 pallet) of H2Opef Waterproofing Membrane liquid in a clean plastic pail. Do not dilute it. Add 20kg (1 bag) of H2Opef Waterproofing Membrane Powder to H2Opef Waterproofing Membrane Liquid and mix to a smooth, trowelable consistency. Allow mortar to slake for 5 to 10 minutes. Adjust consistency if necessary. Remix and apply with roller, brush or trowel.

Application
Apply with brush or trowel on substrate prepared for waterproofing membrane. A minimum of two coats required to form a 1 mm continuous film. Apply the second layer after first coat is dry to touch.

Cleaning
Clean tools with water.

AVAILABILITY AND COST
Availability
LATICRETE and LATAPOXY materials are available worldwide. For

distributor information, call:

Telephone: (65) 6515-3028
Fax: (65) 6515-3037
For online distributor information, visit LATICRETE at se.laticrete.com

Cost
Contact a LATICRETE Distributor in your area.

WARRANTY
LATICRETE South East Asia Pte Ltd warrants that H2Opal Waterproofing
Membrane is free from manufacturing defects and will not break down,
deteriorate or disintegrate under normal usage for a period of one (1)
year from date of purchase subject to the terms and conditions stated.

MAINTENANCE
LATICRETE® and LATAPOXY® grouts require routine cleaning with a
neutral pH cleaner (e.g STONETECH® Stone & Tile Cleaner) and water.
All other LATICRETE and LATAPOXY materials require no maintenance but
installation performance and durability may depend on properly
maintaining products supplied by other manufacturers.
