Grip Traction Additive

Grip Traction Additive is an ultra-durable yet high strength, lightweight pulverized resin that is designed for use in clear and pigmented Guard PA polyaspartic concrete floor coatings.

A viable alternative to heavy aluminum aggregates, Grip Traction Additive can be dispersed and suspended evenly directly into coatings or broadcast depending on the application. While the material is commonly used to improve traction coefficients, it also helps to dramatically increase the durability and abrasion resistance properties of finished floor coating systems.

Grip Traction Additive is recommended to be dispersed at a rate of 57 gm by volume, 3.8ℓ. Additive loads may increase depending on the application. The material is available in 3 separate sizes as follows: 40 (largest), 60 and 100 (smallest) mesh.

**FEATURES/BENEFITS**

- Reduce weight
- Improved toughness and durability
- Preserved clarity
- Chemical resistance

**USES**

- A viable alternative to heavy aluminum aggregates.

**STANDARDS/CERTIFICATIONS**

- ASTM D4541
- ASTM D638
- ASTM D2794
- ASTM 4060
- ASTM D635
- ASTM D2240

**MANUFACTURER/DISTRIBUTED BY**

LATICRETE South East Asia Pte Ltd (Level 2, A3)
No. 38 Sungei Kadut, Street 2, Singapore 729245
Telephone: +65 6515 3028   Fax: +65 6515 3037
Internet: se.laticrete.com
Suitable Substrates
As per LATICRETE Polyaspartic Coating

Packaging
473ml jar

Approximate Coverage
One set of Grip Traction Additive yield a coverage of approximate 3m² at 0.2mm thick per coat

Shelf Life
Unlimited. Store at 4°C to 24°C in a covered area (out of the sun). Take special care into ensuring that chip is not exposed to moisture.

Color
Raw: White
Dispersed In Coatings: Clear

Limitations
Refer to data sheet for applicable LATICRETE Polyaspartic Coatings

Cautions
- Refer to Safety Data Sheet (SDS)

**Mild swelling in ketone and ester solvents
Specifications are subject to change without notification. Technical data shown in product data sheets are typical but reflect laboratory test procedures conducted in laboratory conditions. Actual field performance and test results will depend on installation methods and site conditions. Field test results will vary due to critical job site factors. All recommendations, statements and technical data contained in this data sheet are based on tests we believe to be reliable and correct, but accuracy and completeness of said tests are not guaranteed and are not be construed as a warranty or guaranty of any kind. Satisfactory results depend upon many factors beyond the control of LATICRETE International, Inc. User shall rely on their own information and tests to determine suitability of the product for the intended use and user assumes all risk, loss, damage, expense and liability resulting from their direct use, indirect use or consequential to their use of the product. LATICRETE shall not be liable to the buyer or any third party for any injury, loss or damage directly or indirectly resulting from use or inability to use the product.

INSTALLATION
Grip Traction Additive is recommended to be dispersed at a load rate of 57 - 85 gm by volume per 3.8ℓ. Additive loads may increase depending on the application.

AVAILABILITY AND COST
Availability
LATICRETE® materials are available worldwide. For distributor information, call:
Telephone: (65) 6515-3028
Fax: (65) 6515-3037
For on-line distributor information, visit LATICRETE at se.laticrete.com

Cost
Contact a LATICRETE Distributor in your area.

WARRANTY
Subject to the conditions and limitations stated below, LATICRETE South East Asia Pte Ltd warrants that its products will be free from manufacturing defects and will not break down or deteriorate under normal usage for a period of one (1) year from the date of purchase when installed in accordance with the written specifications of LATICRETE and industry standard guidelines.

MAINTENANCE
The long term performance, appearance, and life expectancy of wear surface products are critically dependence upon a good routine maintenance program designed specifically for the installed wear surface. LATICRETE polyaspartic and epoxy floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly
