Guard PA Pure Clinical Plus

Guard PA Pure Clinical Plus is a low VOC and minimal odor, fast curing, two part polyaspartic aliphatic polyurea sealer/finish coating for hospitals, veterinary clinics, and pharmaceutical facilities. The material is applied in a single or multiple coats by brush, roller, or squeegee at varying thicknesses to a variety of substrates.

It can be applied as a top coat within seamless, multi-build Flake/Colored Quartz coating systems. Important characteristics of Guard PA Pure Clinical Plus are its rapid-cure, its durable, seamless finish, and its antimicrobial properties. Guard PA Pure Clinical Plus is low VOC and does not emit strong solvent odors during installation.

Guard PA Pure Clinical Plus is equipped with a silver-ion based antimicrobial additive designed to protect the coating from degradation caused by microbial growth. Guard PA Pure Clinical Plus, unlike traditional coatings or surface treatments, remains active for the lifetime of the floor coating - even when damaged or worn. The material provides optimal impact, abrasion, and chemical resistance characteristics. Guard PA Pure Clinical Plus is available in all LATICRETE® commercial, industrial and decorative flooring systems.

**FEATURES/BENEFITS**

- Antimicrobial protection keeps the floor coating cleaner by inhibiting the growth of staining bacteria on the floor coating.
- Walk-on in hours; 24-hour return to service
- Low VOC; low odor installation
- Excellent abrasion, impact & wear resistance
- UV-Resistant; retains optical clarity of clear sealer/finish
- Low temperature cure (4°C)
- Excellent chemical & stain resistance, resistant to Skydrol®
- MicroMedia agents can be introduced as traction additives
- Tolerant to 149°C for random, incidental heat contact
- Meets FDA/CFSAN U.S. Food Code physical facilities criteria as outlined in 6.100.11 Surface Characteristics USDA acceptable.

**USES**

- Hospitals
- Veterinary clinics
- Pharmaceutical facilities

**MANUFACTURER/ DISTRIBUTED BY**

LATICRETE South East Asia Pte Ltd (Level 2, A3)
No. 38 Sungei Kadut, Street 2, Singapore 729245
Telephone: +65 6515 3028 Fax: +65 6515 3037
Internet: se.laticrete.com.sg

**STANDARDS/CERTIFICATIONS**

- ASTM D638
- ASTM D522
- ASTM D968

This product has been certified green
Singapore Green Building Council.
Suitable Applications
- Hospitals & Clinics
- Veterinary Facilities & Clinics
- Food & Beverage Processing
- Commercial & Institutional Kitchens
- Locker Rooms & Showers
- Medical Manufacturing
- Clean rooms & Research Laboratories
- Restrooms

Packaging
Clear Units:
Part A: 5 gal (18.9 L) pail
Part B: 5 gal (18.9 L) pail

Pigment Base Units:
Part A: Short Filled 3.75 gal (14.2 L) in a 5 gal (18.9 L) pail
Part B: 5 gal (18.9 L)

Shelf Life
12 months unopened. Store at 4°C to 24°C in a covered area (out of the sun). Material should be kept in a cool dry place prior to application.

Color
Guard PA Pure Clinical Plus is available in a clear gloss finish as well as all standard LATICRETE® colors, including safety colors.

Limitations
- Not intended for use over countertops

Cautions
FOR PROFESSIONAL USE ONLY
- Thoroughly read all technical data sheets, application guidelines, warranty disclaimers and Safety Data Sheets (SDS) prior to use.
- Application guides depending on the dye system employed are available at se.laticrete.com.
- Polyaspartic aliphatic polyurea products contain chemical ingredients that are considered hazardous. Read the container label warning and SDS prior to use.
- Wear safety eye protection and safety gloves when applying.
- Contact with eyes may cause irritation. Flush eyes with water for 15 Minutes, if symptoms persist seek medical attention.
- Tape color transition lines firmly to reduce dye “bleed” under taped line.
- Material should be kept in a cool dry place prior to application
- Maximum Recoat time: 24 hours

Mockups and field test areas are required in order to validate performance and appearance related characteristics (including but not limited to color, inherent surface variations, wear, anti-dusting, abrasion resistance, chemical resistance, stain resistance, coefficient of friction, etc.) to ensure system performance as specified for the intended use, and to determine approval of the decorative flooring system.

Specifications are subject to change without notification. Technical data shown in product data sheets are typical but reflect laboratory test procedures conducted in laboratory conditions. Actual field performance and test results will depend on installation methods and site conditions. Field test results will vary due to critical job site factors. All recommendations, statements and technical data contained in this data sheet are based on tests we believe to be reliable and correct, but accuracy and completeness of said tests are not guaranteed and are not construed as a warranty or guaranty of any kind. Satisfactory results depend upon many factors beyond the control of LATICRETE International, Inc. User shall rely on their own information and tests to determine suitability of the product for the intended use and user assumes all risk, loss, damage, expense and liability resulting from their direct use, indirect use or consequential to their use of the product. LATICRETE shall not be liable to the buyer or any third party for any injury, loss or damage directly or indirectly resulting from use or inability to use the product.

INSTALLATION
Surface Preparation
Surfaces to be coated must be free of grease and any other contaminants that may impede adhesion. Always check the surface for any bond inhibitors prior to application. Any repairs must be addressed prior to application and should be repaired in accordance with ICR standards. A moisture emission measurement system is necessary to assess the moisture drive of a concrete slab prior to installation of any toppings or coatings. The transmission rate must not exceed three pounds per 1,000 square feet per 24 hours. The relative humidity of the slab must not exceed 75% as tested per ASTM F2170 Relative Humidity in Concrete Slab test. If there is a moisture emission situation in excess of the above rate, use MVP. The application process will depend on the system being installed, reference appropriate specification for details. Guard PA Pure Clinical Plus may be used as a topcoat or applied direct to concrete. Concrete must be ground to an ICR1 CSP2 profile or the equivalent of 3060grit sandpaper. This profile is achieved with a surface grinder equipped with metal bond diamonds.

Mixing
Maintaining a consistent storage temperature prior to application will maximize working time.

Pigmented Coatings
Add full contents of LATICRETE Pigment pack directly into short filled Part A Tint Base. Mix pigment into Part A with a slow speed drill mixer for 2 minutes to fully disperse the aspartic pigments. Failure to properly
mix pigments may lead to an inconsistent finish and reduced product performance.

**Mixing Part A with Part B**
Mix part A and part B in equal parts (1:1) using a clean, dry working vessel. Use a paddle mixer on slow speed for 2 minutes. Avoid overmixing or creating a vortex that would introduce air. Do not mix below the dew point, which will shorten the pot life. No induction time is required prior to use. If micromedia agents (e.g. Grip Traction Additive) are to be incorporated, they are to be added after thoroughly mixing A and B.

**Application**
Suggested application thickness is 8 mils (0.2 mm) or 18.5 m² per coat, per gallon. Contact LATICRETE directly for specifics on effective application techniques. Maximum application mil thickness in a single application is 10 mils (0.25 mm). Material will be dry to the touch 2-3 hours after application, dependent on ambient temperature, slab temperature and humidity. Product may be recoated within 2-24 hours following application. Light foot traffic is acceptable 3 to 4 hours following application and vehicular traffic is acceptable 24 hours after application. If using as a topcoat over epoxy, it is critical that the epoxy not be let down with alcohol during installation or cleaned with alcohol prior to topcoating. Always apply over an epoxy coating within the epoxy manufacturer’s recommended recoat time.

**AVAILABILITY AND COST**

**Availability**
LATICRETE® materials are available worldwide. For distributor information, call:
Telephone: (65) 6515-3028
Fax: (65) 6515-3037
For on-line distributor information, visit LATICRETE at [so.laticrete.com](http://so.laticrete.com)

**Cost**
Contact a LATICRETE Distributor in your area.

**WARRANTY**
Subject to the conditions and limitations stated below, LATICRETE South East Asia Pte Ltd warrants that its products will be free from manufacturing defects and will not break down or deteriorate under normal usage for a period of one (1) year from the date of purchase when installed in accordance with the written specifications of LATICRETE and industry standard guidelines.

**MAINTENANCE**
The long term performance, appearance, and life expectancy of wear surface products are critically dependent upon a good routine maintenance program designed specifically for the installed wear surface. LATICRETE polyaspartic and epoxy floor coating systems are nonporous, causing dirt and contaminants to remain on the surface. The use of properly placed walk-off mats, inside and outside, will help increase the life of the floor. Recommend maintenance program consist
