

How to Connect STRATA_HEAT™ Thermostat to Google Home™ TDS 296

- Open your IFTTT App.
- Click the Explore page at the bottom of the app. In the search bar type in Laticrete then click search.
- Once you have typed Laticrete® in the search bar, you should see Laticrete Smart Thermostat™ appear down below.
- Select Laticrete Smart Thermostat.
- Click Connect.
- A message will appear saying that “IFTTT” Wants to Use “ifttt.com” to Sign In. This allows the app and website to share information about you” Click Continue.
- A screen will appear that brings you to the www.mylaticrete.com account login.
- Type in the email address and password associated with your my.mylaticrete.com account.
- Once you are done typing in your email and password, click the login button.
- A pop-up will appear that says “Allow IFTTT to access your details. Click Allow Now, you can create your applets. An applet connects two or more apps/devices together.
- Click Create
- Where it says, If This click the black Add button.
- Select the Laticrete Smart Thermostat icon.
- Choose a trigger of your choice. Some options include temperature rises above, temperature drops below, away when scheduled to be home, etc.
- Once you select a trigger, make sure that the Laticrete Smart Thermostat Account selected is the account you logged into earlier.
- Then, select the room that you would like to have this trigger occur.
- Next, if needed, add the drops below/rises above temperature.
- Click Create Trigger.
- Now that the If has been selected, it is time to create the Then That trigger.
- Once again, select the black Add button.
- Select a service. Choose the Laticrete Smart Thermostat icon.
- Choose an action to occur.
- Once again, verify that the email is accurate to the one you logged in with and then select which device you want this action to occur.
- After, select Create Action.
- Click Continue.
- A screen will appear with what you have created. Review it, and then click Continue.
- Click Finish.
